DIA: Strategy Evidence and Confidence Overview

Evidence labels use scale-free statistics: p-value, percentile, normalized RCSI, robustness, and stability.

Strategy	Evidence	Verdict	Confidence	p-value	Prom.	Pctile	RCSI_z
Trend	Likely Random	Luck	Moderate	0.843	0.07	15.7	-0.91
Mean Reversion	Positive but Inconclusive	Inconclusive	Low	0.248	0.61	75.2	0.54
Random	Likely Random	Luck	Moderate	0.740	0.13	26.0	-0.69
Momentum	Strongly Random	Luck	High	0.931	0.03	6.9	-1.17
Breakout	Likely Random	Luck	Moderate	0.791	0.10	20.9	-0.79

Interpretation:
Prom. = -log10(p), so larger values indicate rarer outcomes under the null.
Pctile and RCSI_z provide scale-free evidence and are more comparable across tickers.
Benchmark context appears in the comparison table and equity curve rather than this verdict summary.

Likely Random
Positive RCSI indicates performance above the simulated baseline (skill).
Negative RCSI suggests performance consistent with or below randomness.
Labels show the overall evidence class, not RCSI alone.

DIA: Trade-Level Return Ratio by Strategy and Market Regime
Gray hatched bars are suppressed because the regime cell has fewer than 20 trades.

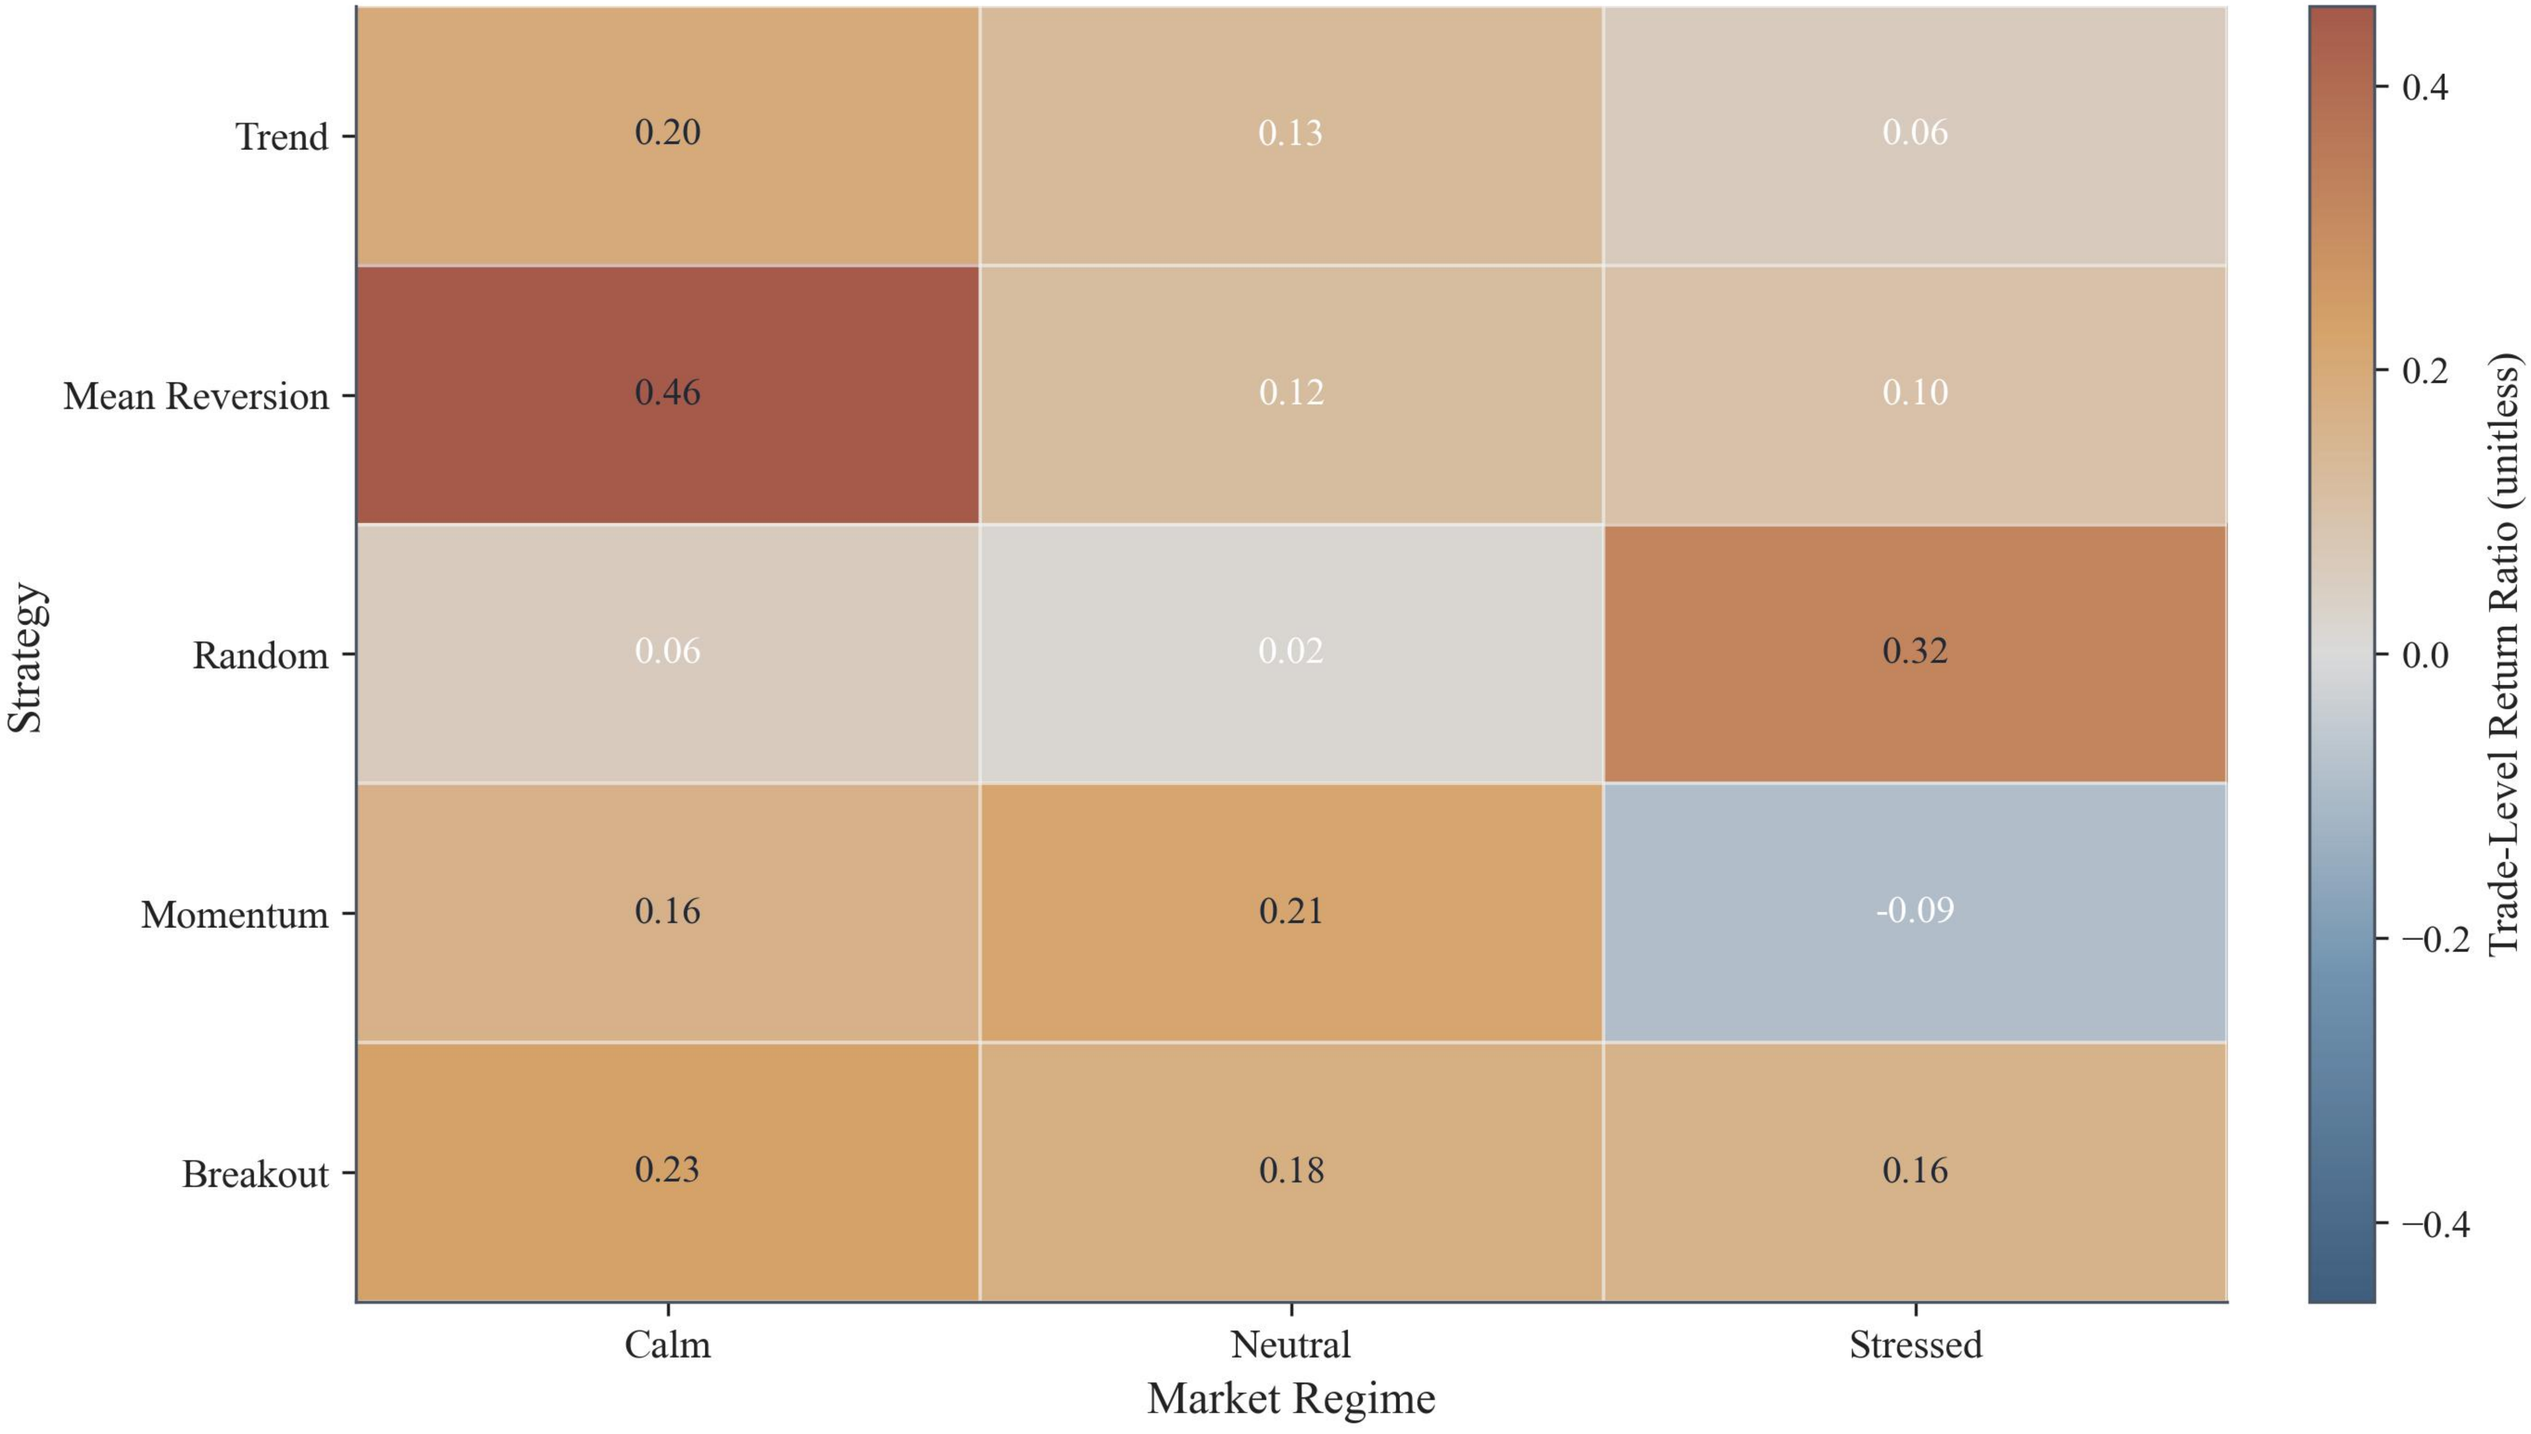
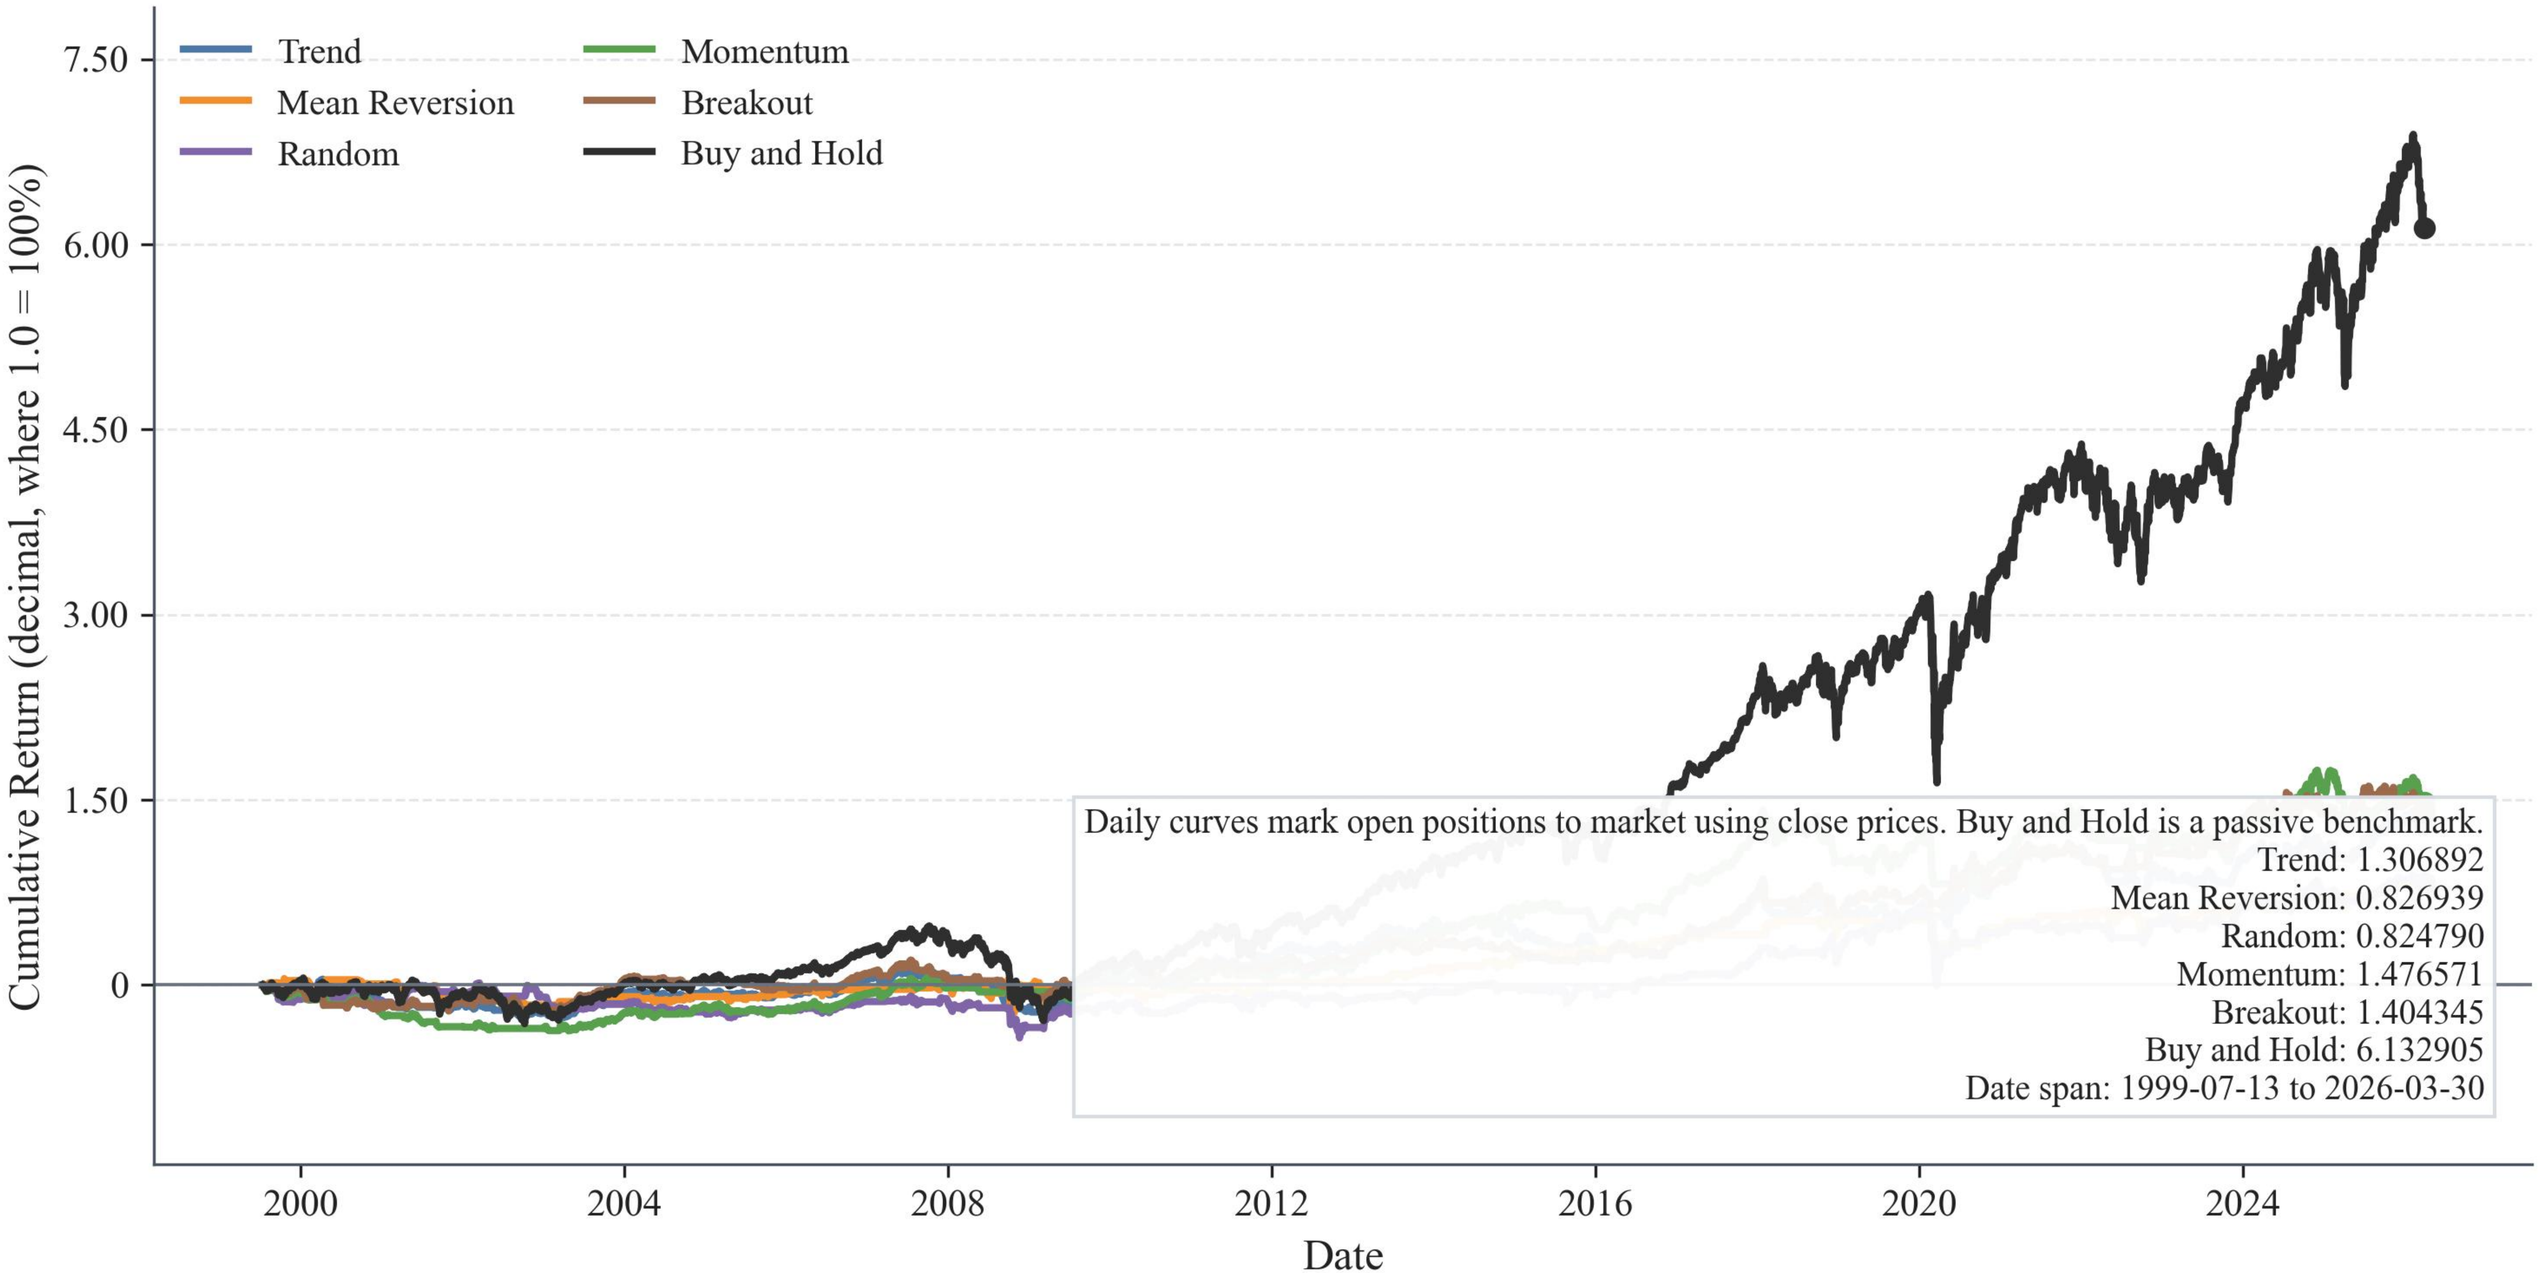
DIA: Strategy Performance Across Market Regimes

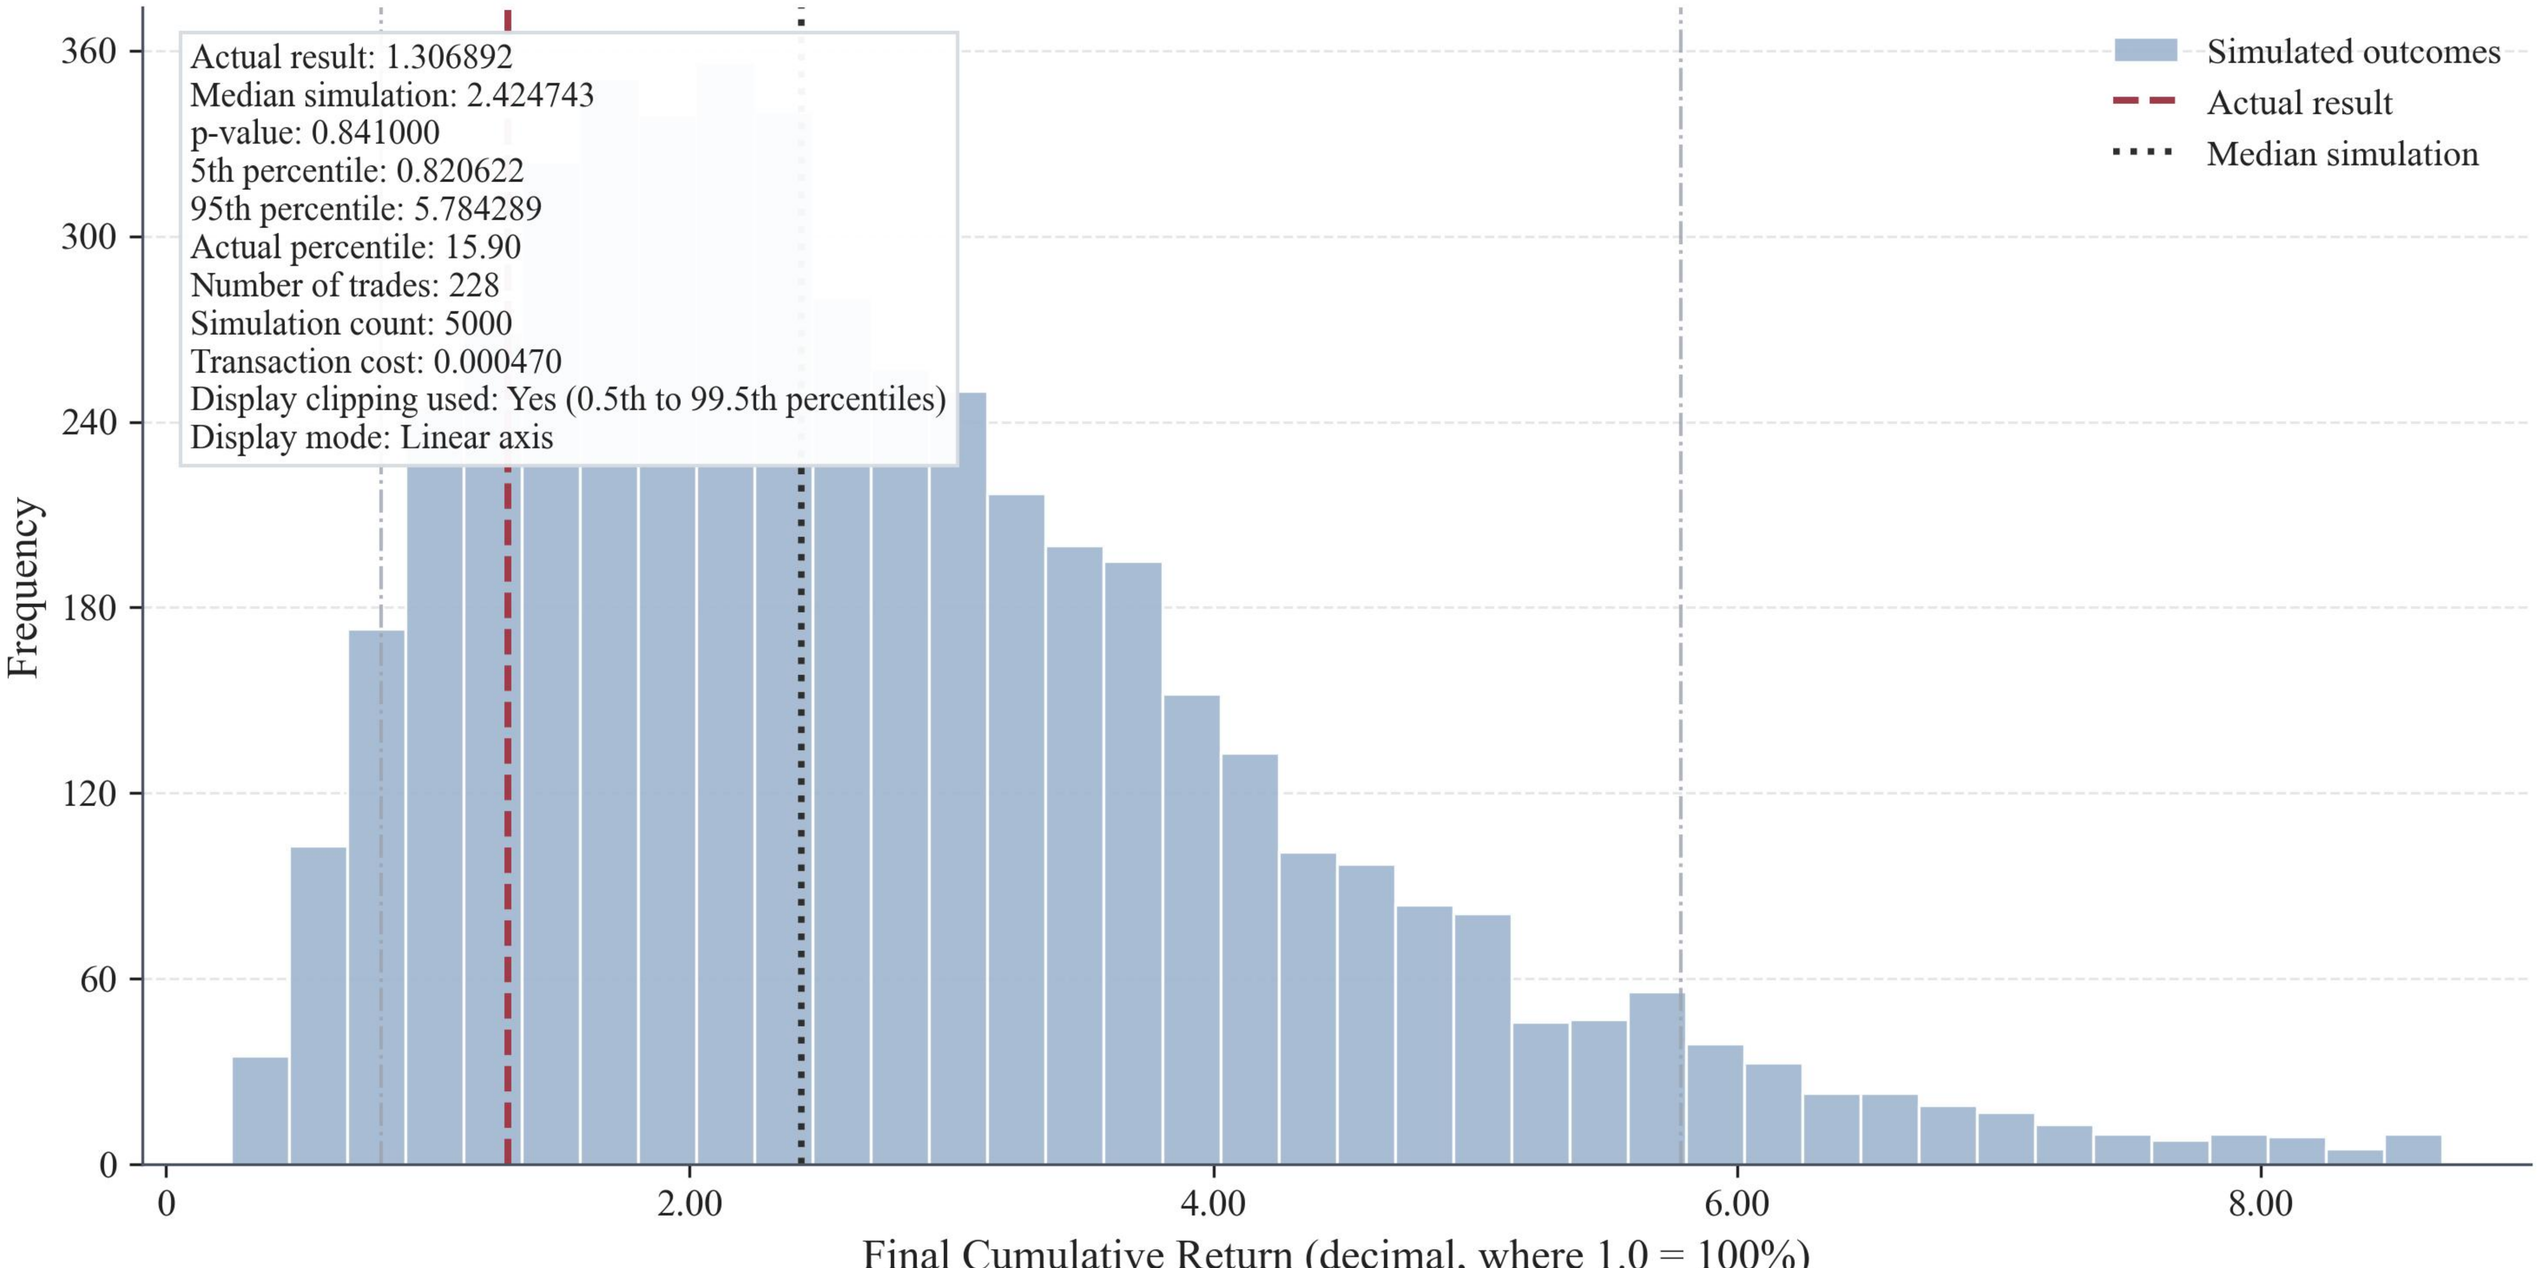
Gray cells are suppressed because the regime cell has fewer than 20 trades.



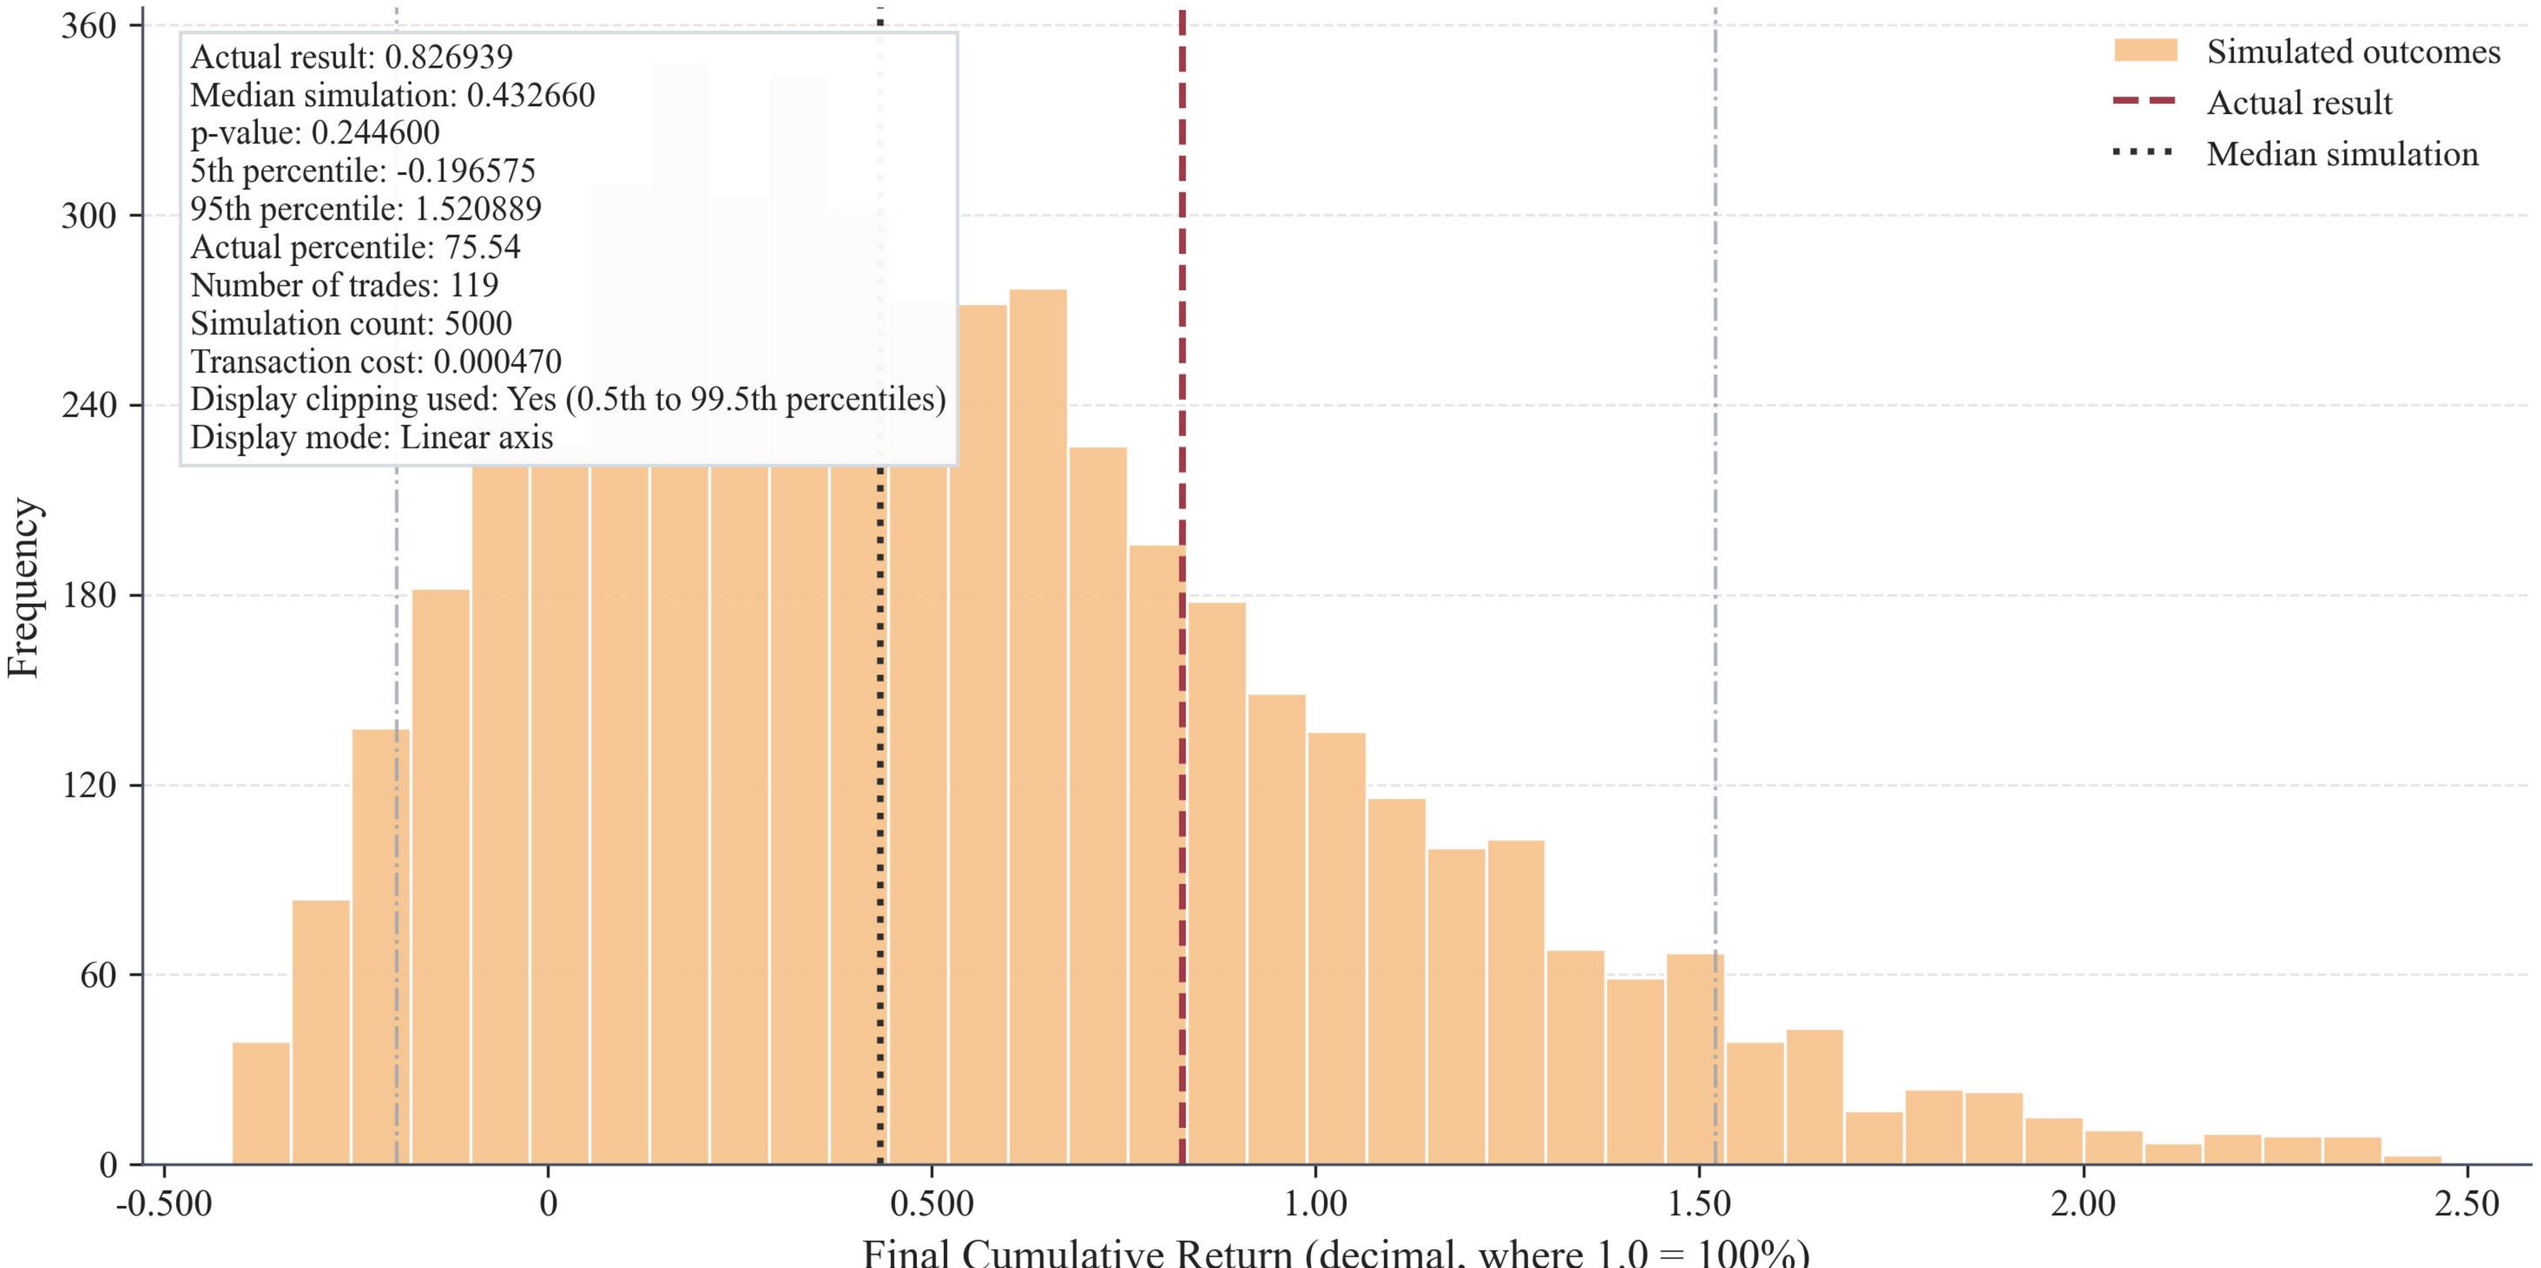
DIA: Daily Equity Curves by Strategy and Benchmark



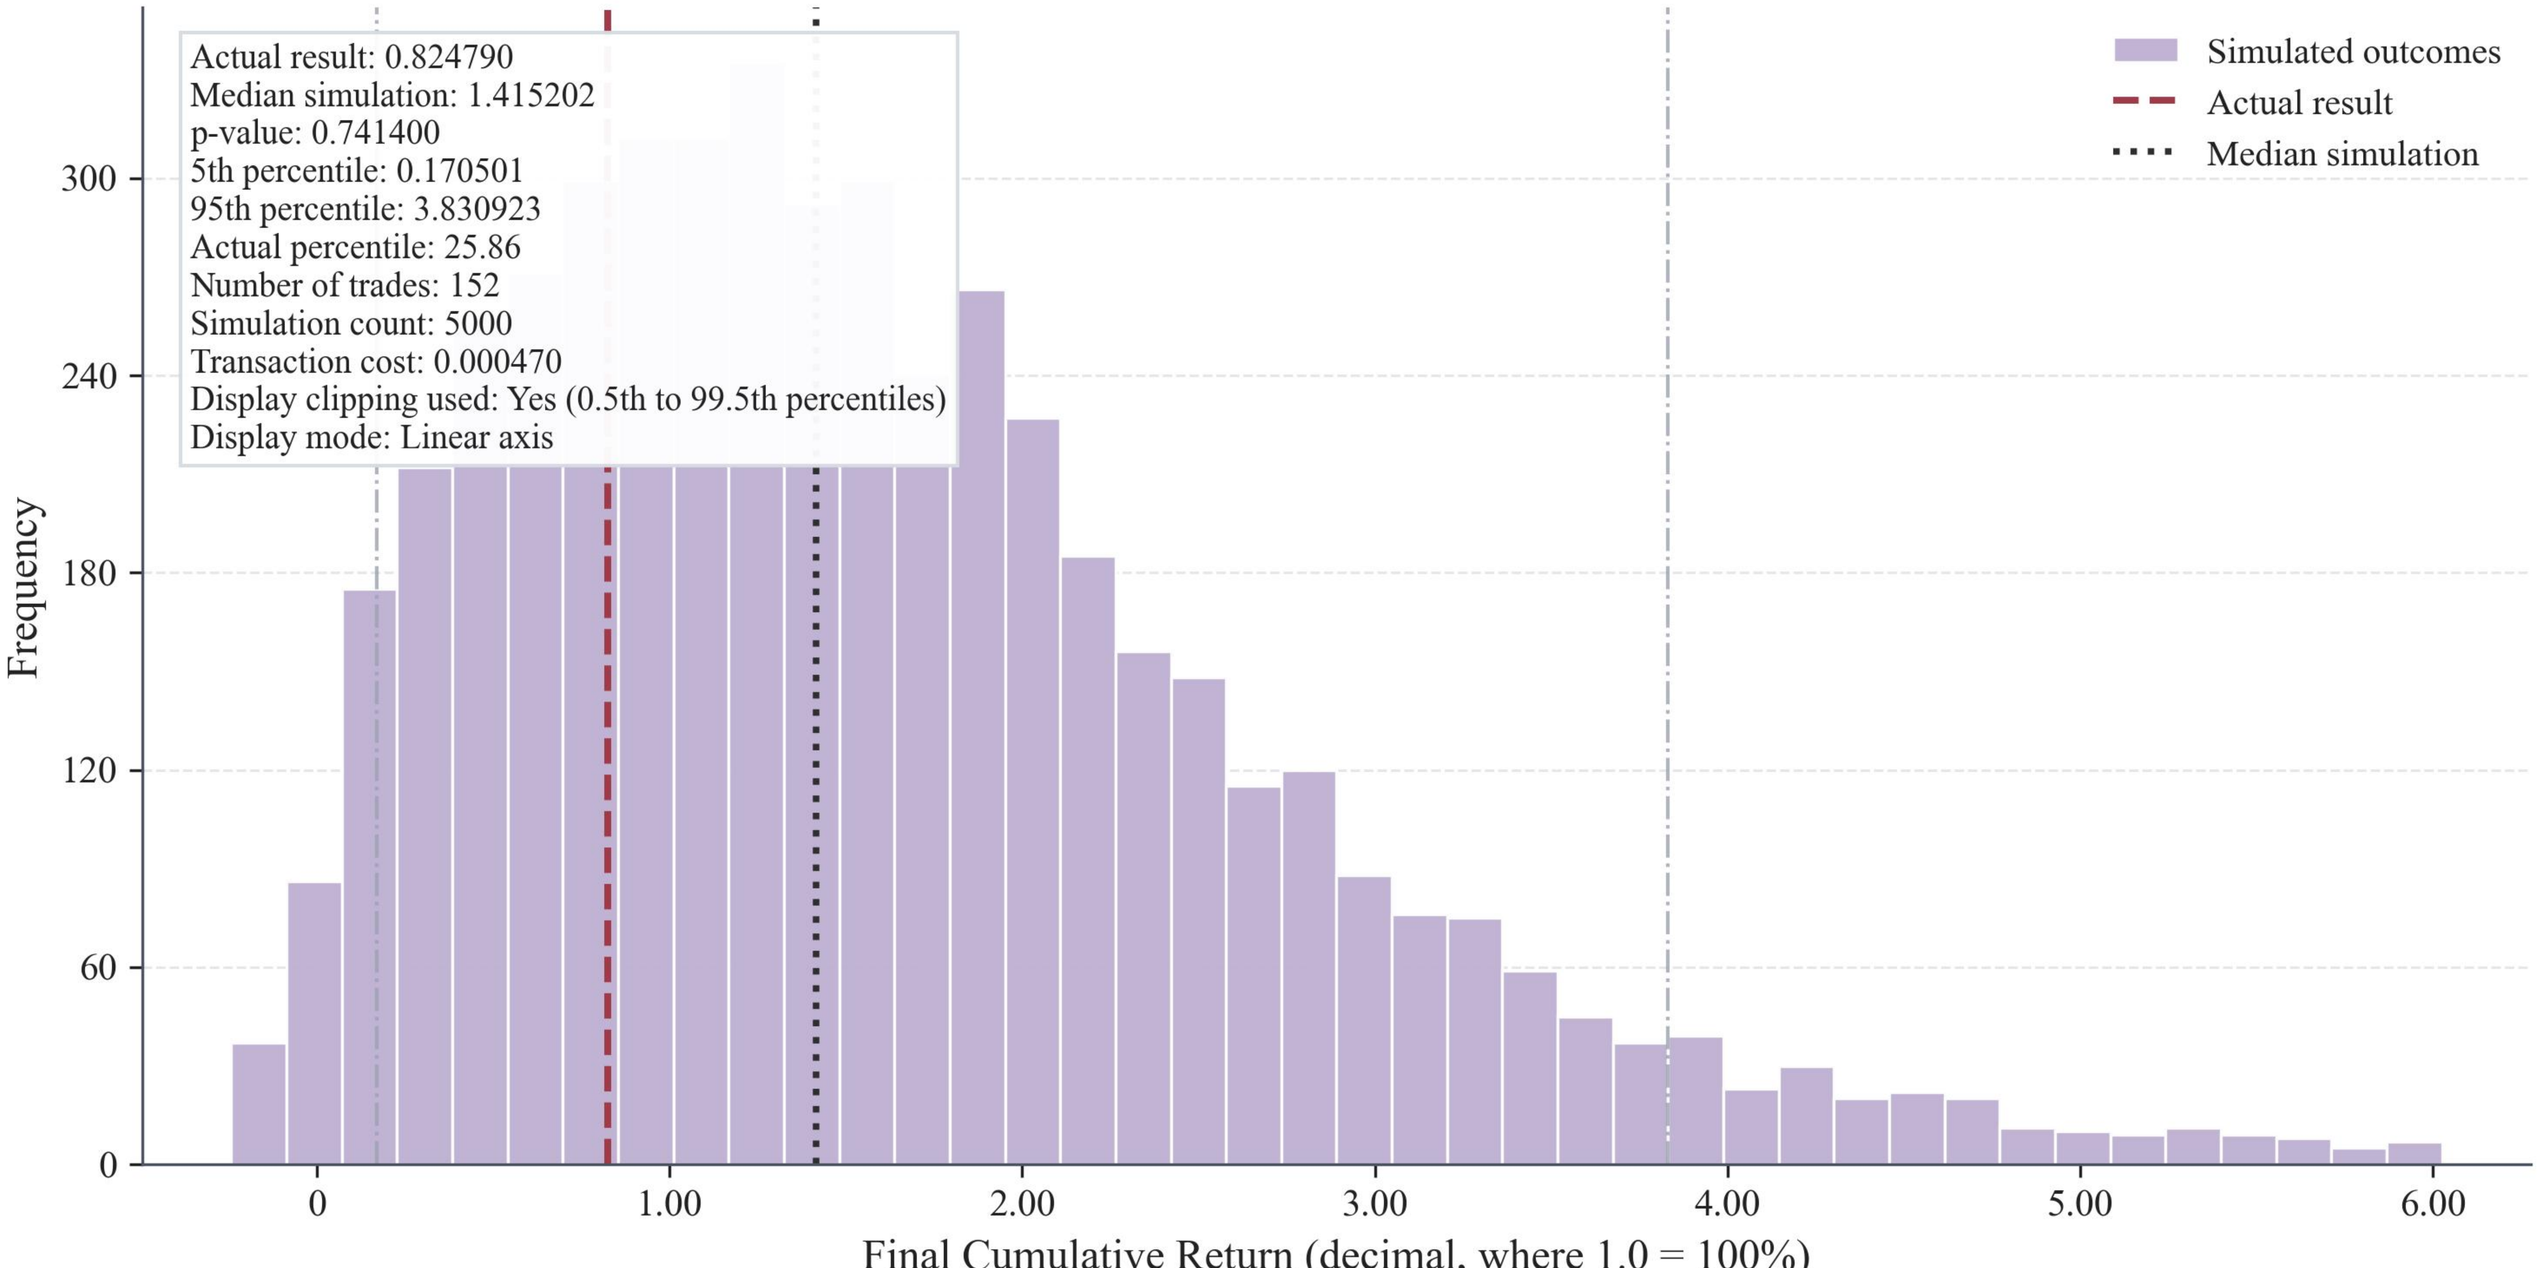
DIA: Monte Carlo Distribution of Final Returns, Trend Strategy



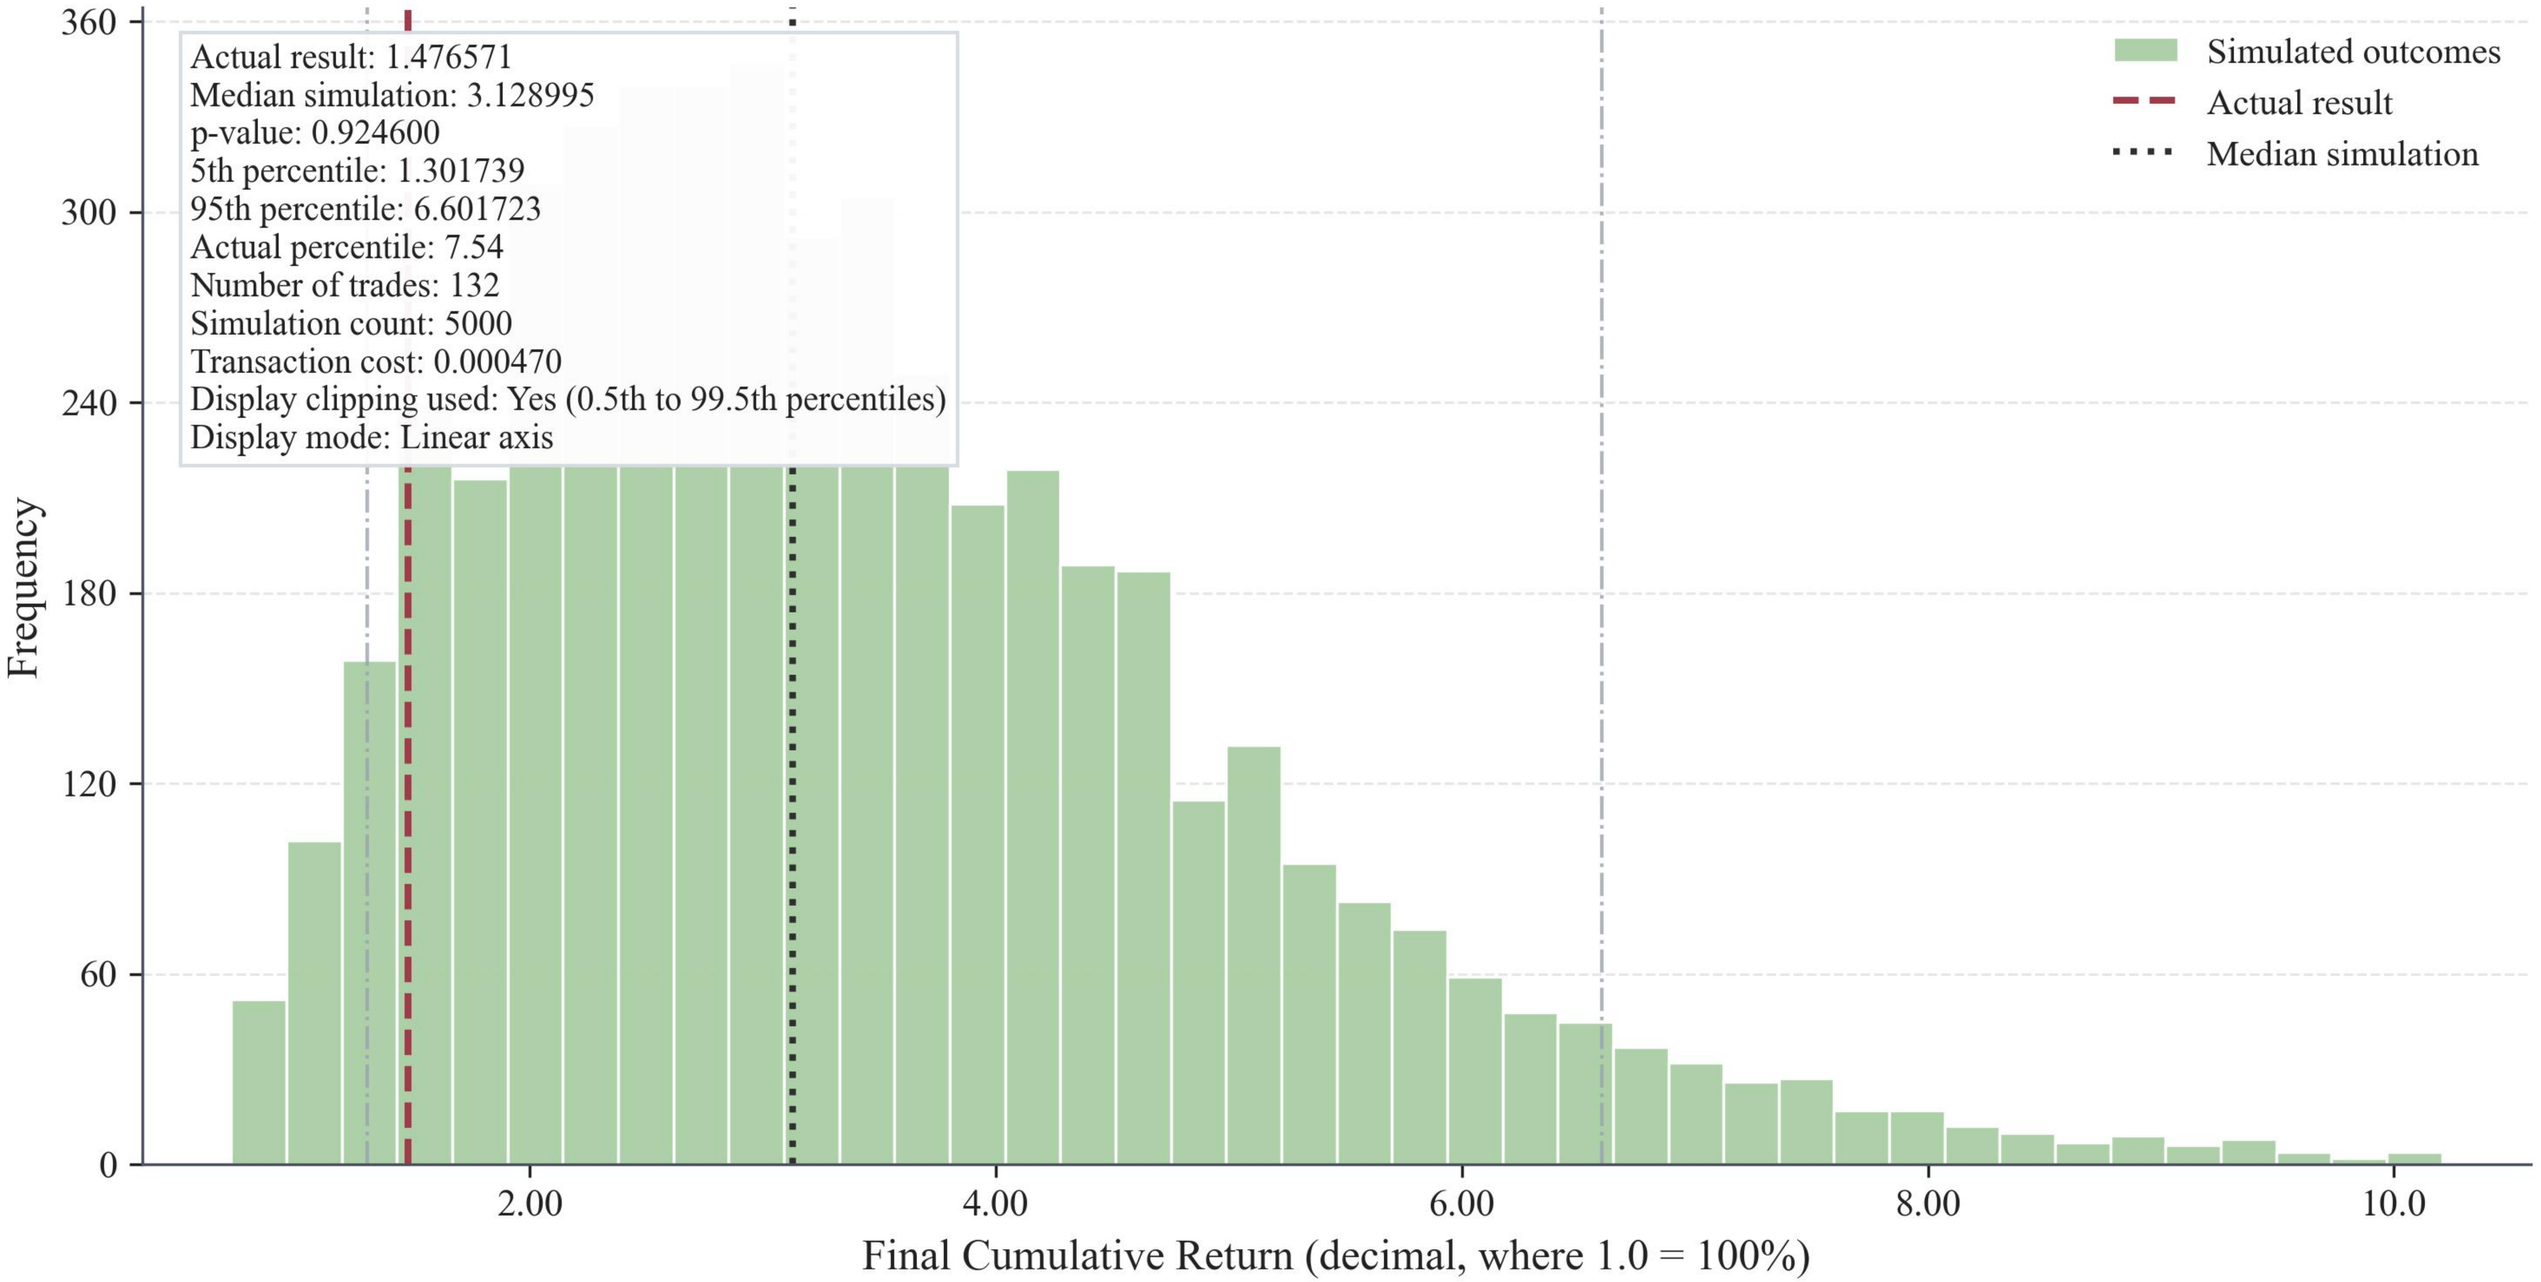
DIA: Monte Carlo Distribution of Final Returns, Mean Reversion Strategy



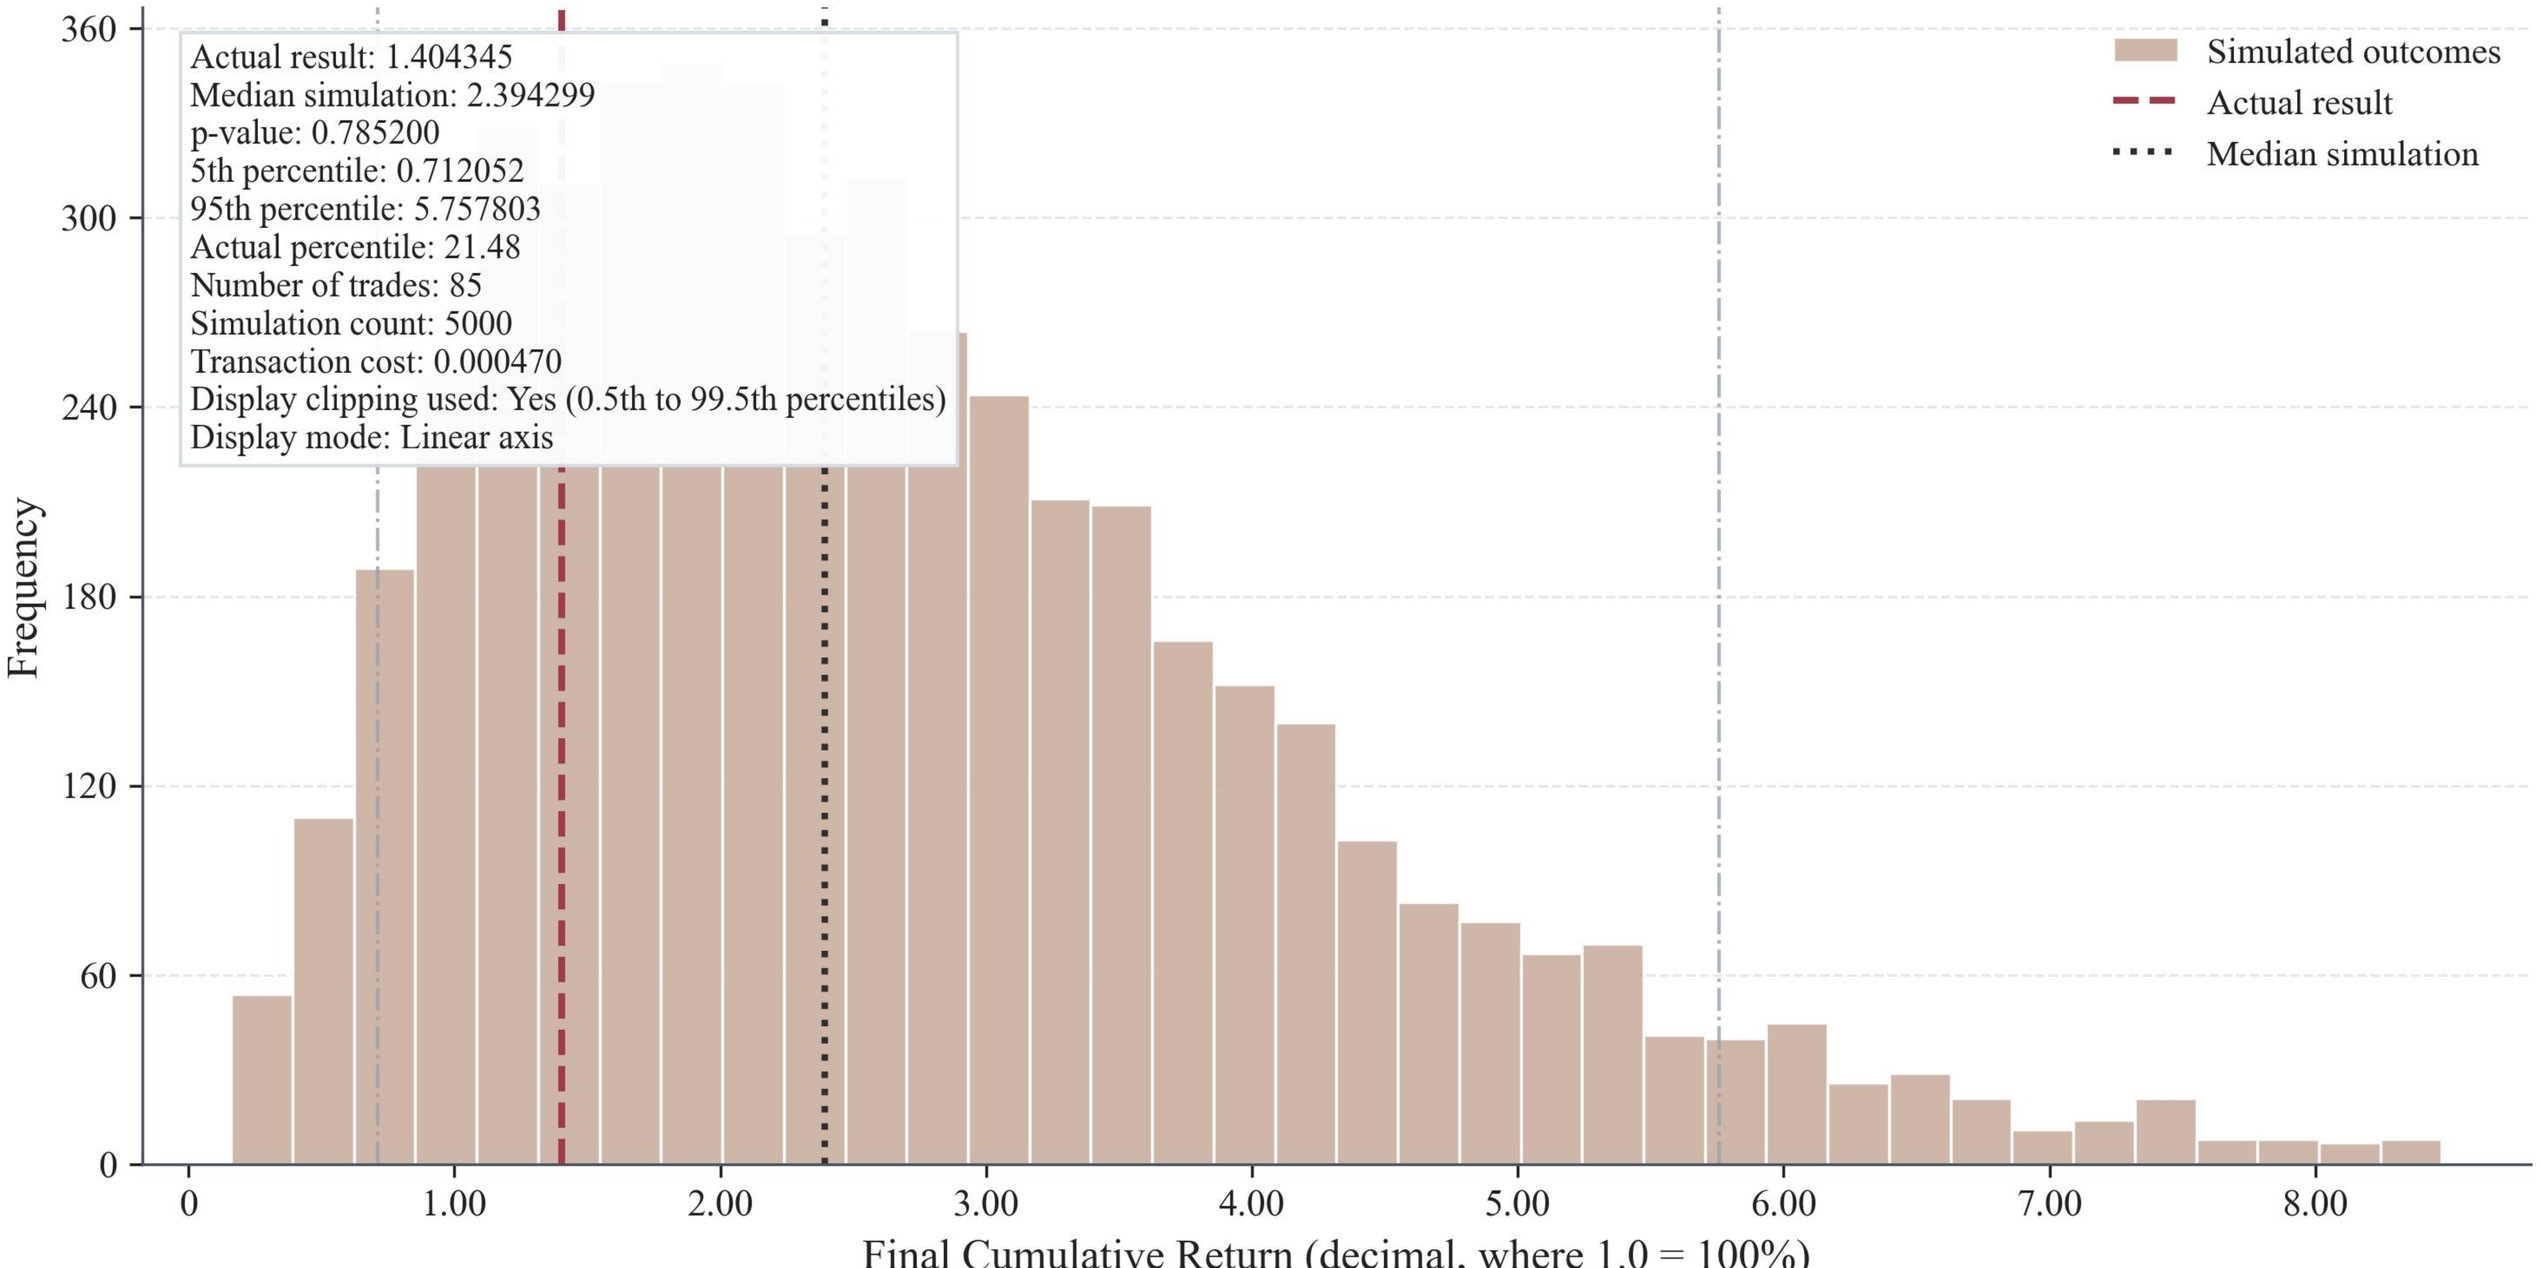
DIA: Monte Carlo Distribution of Final Returns, Random Strategy



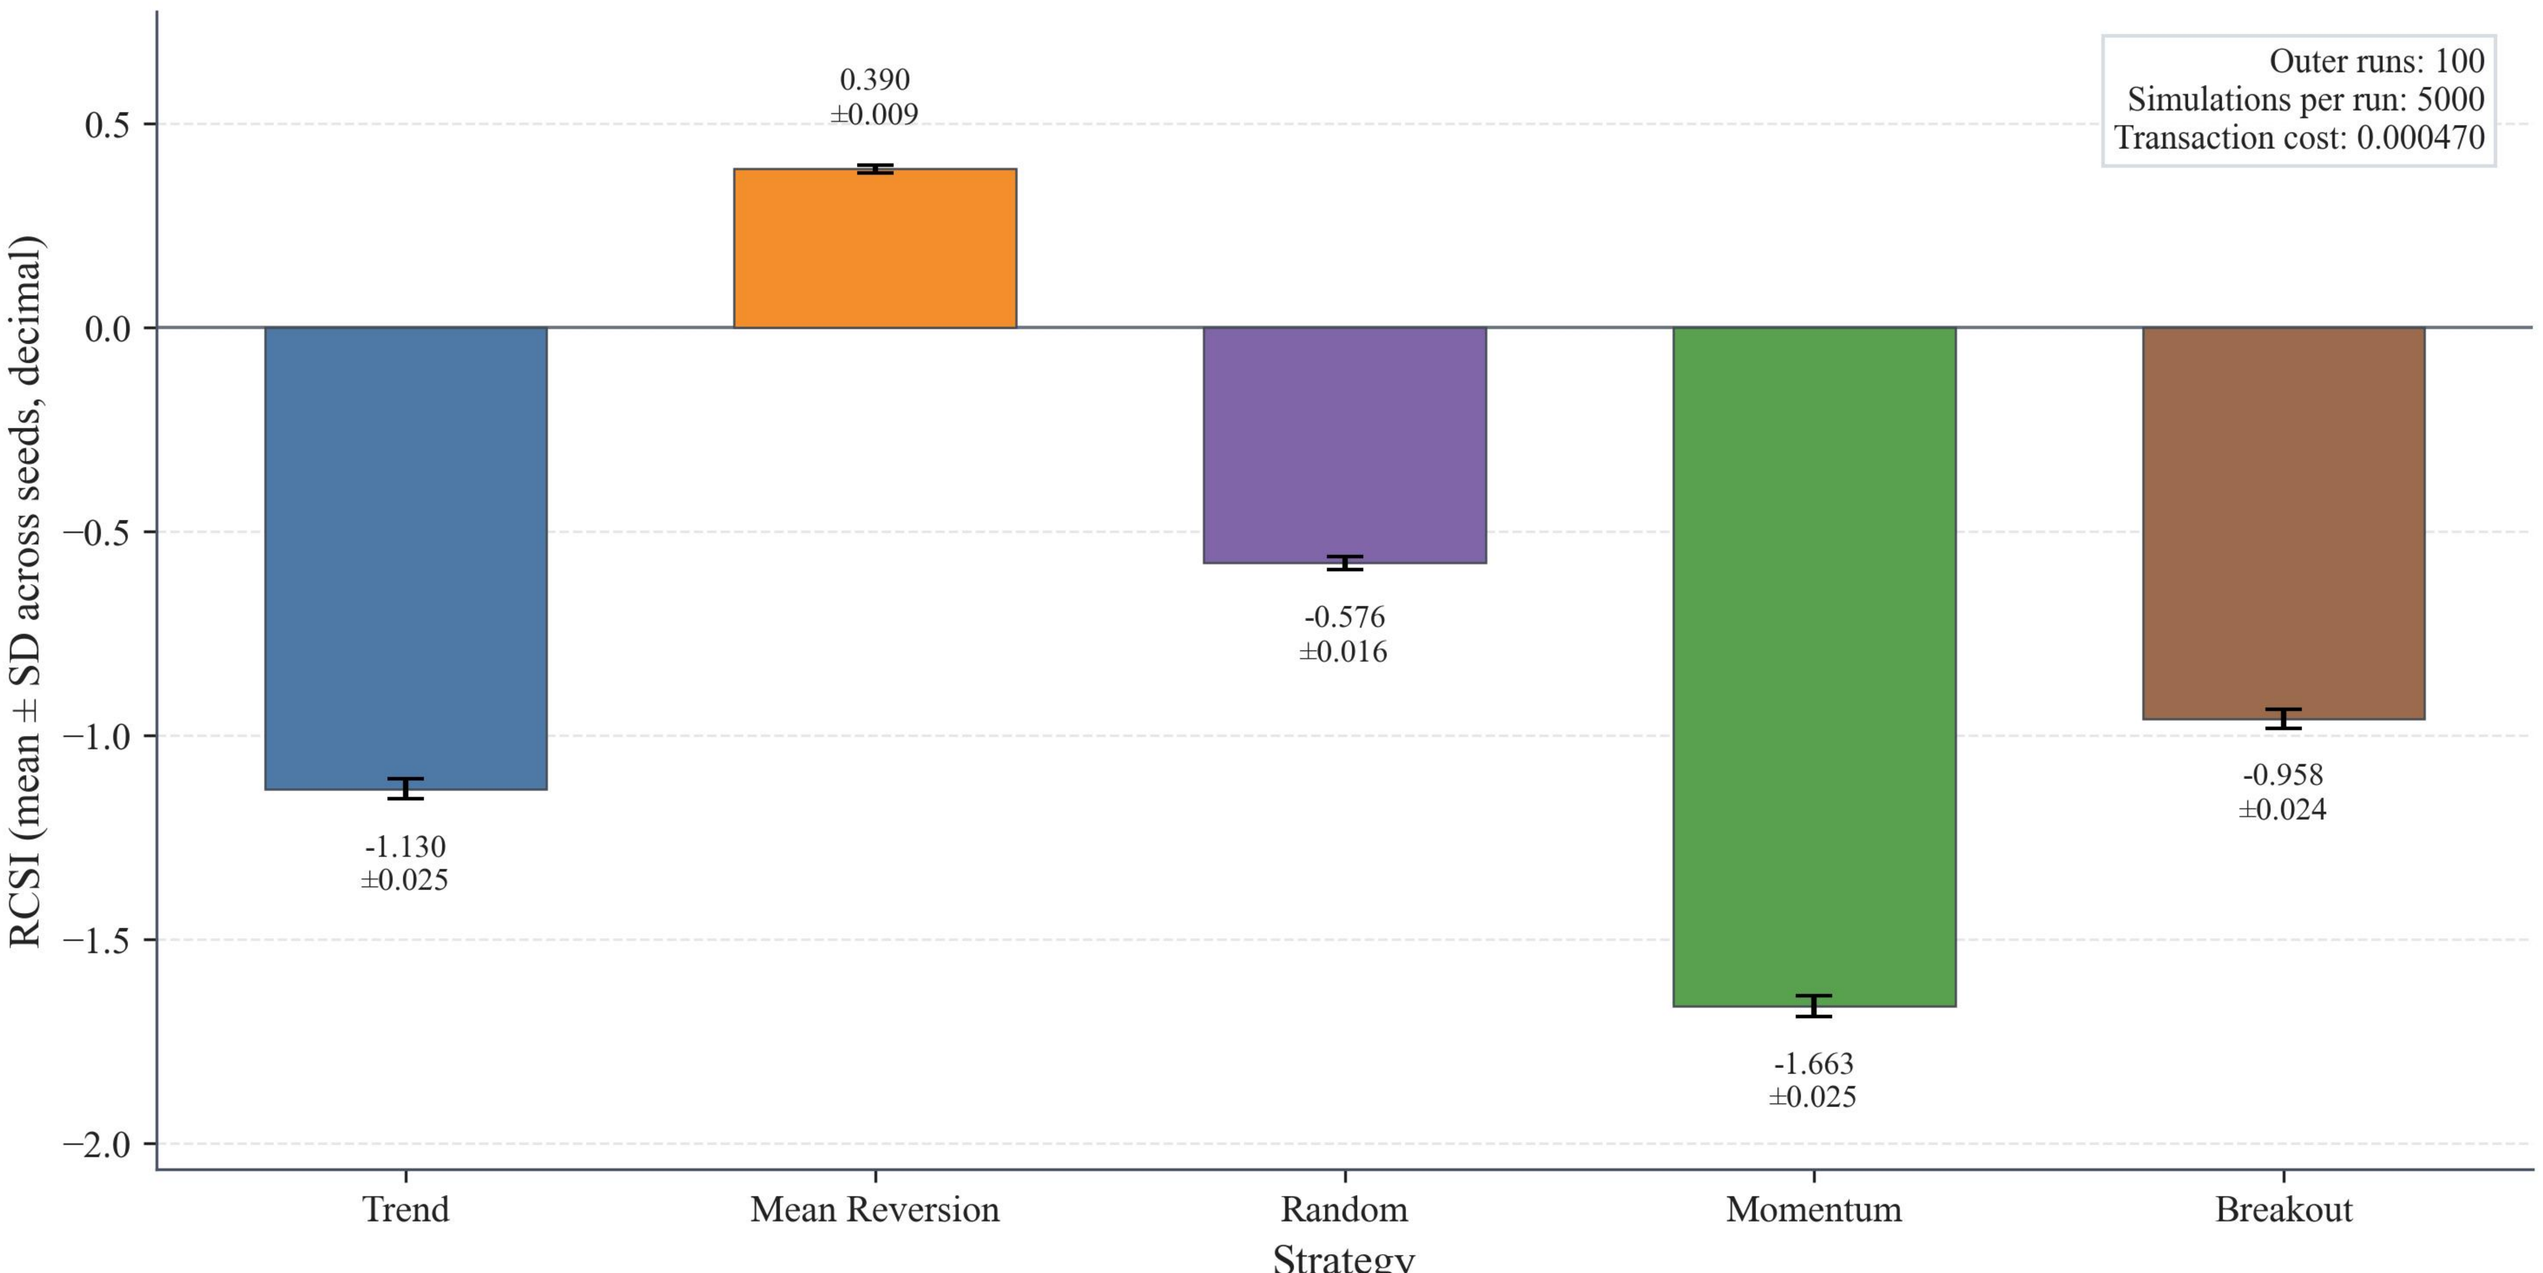
DIA: Monte Carlo Distribution of Final Returns, Momentum Strategy



DIA: Monte Carlo Distribution of Final Returns, Breakout Strategy

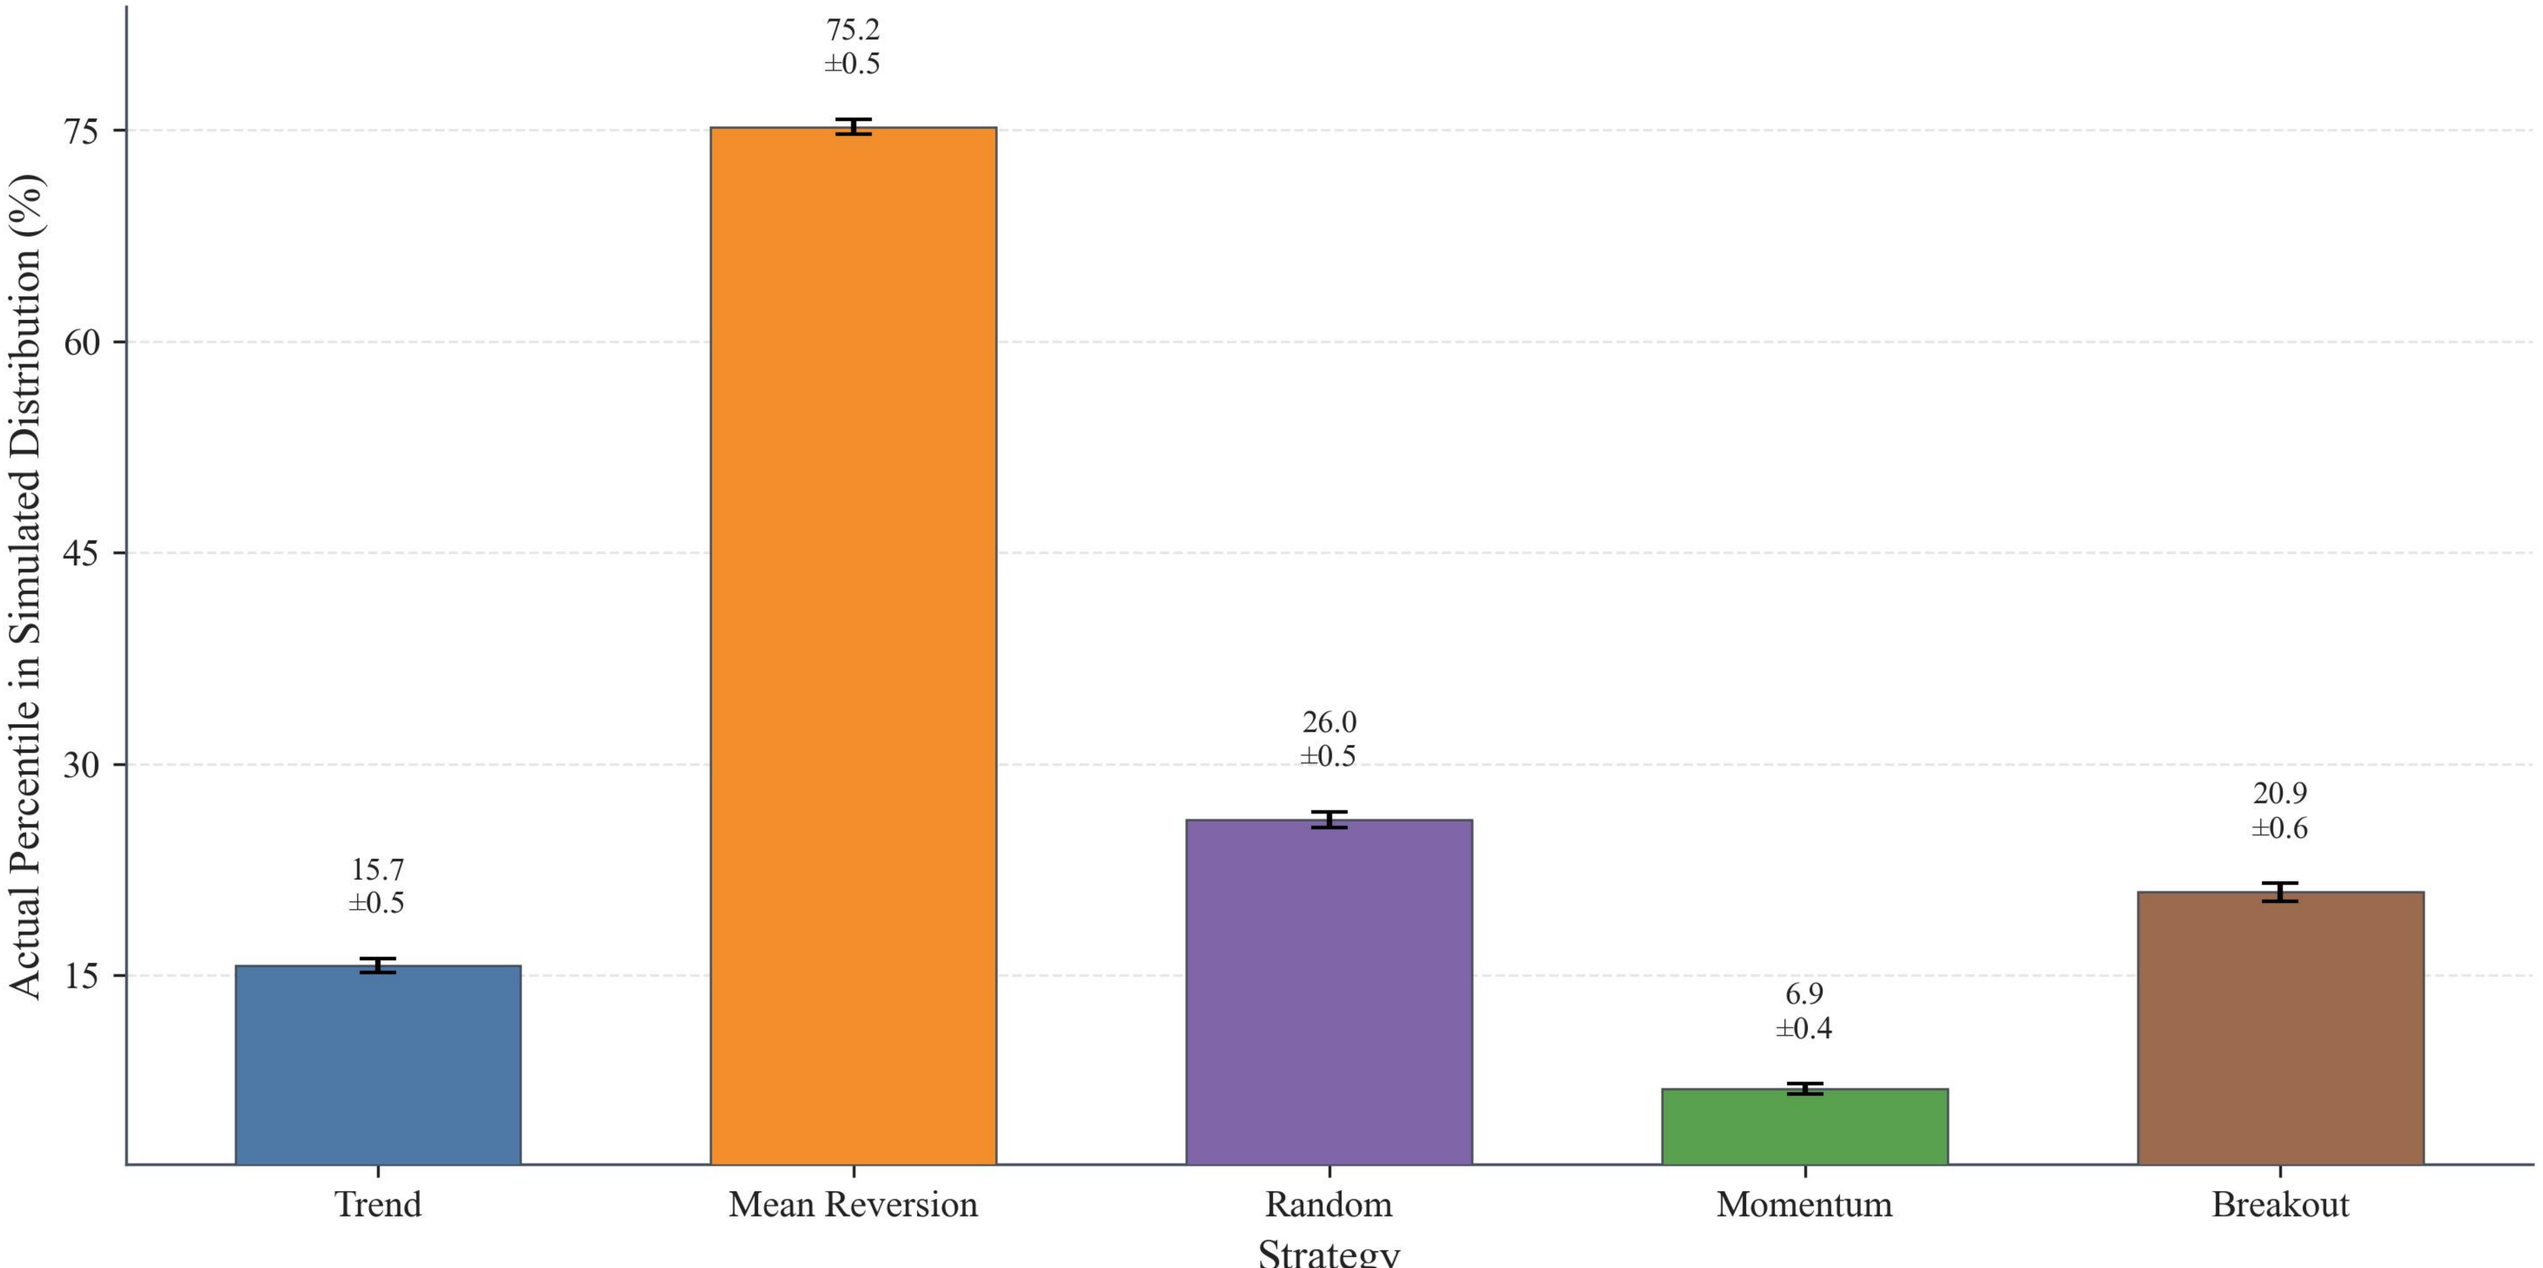


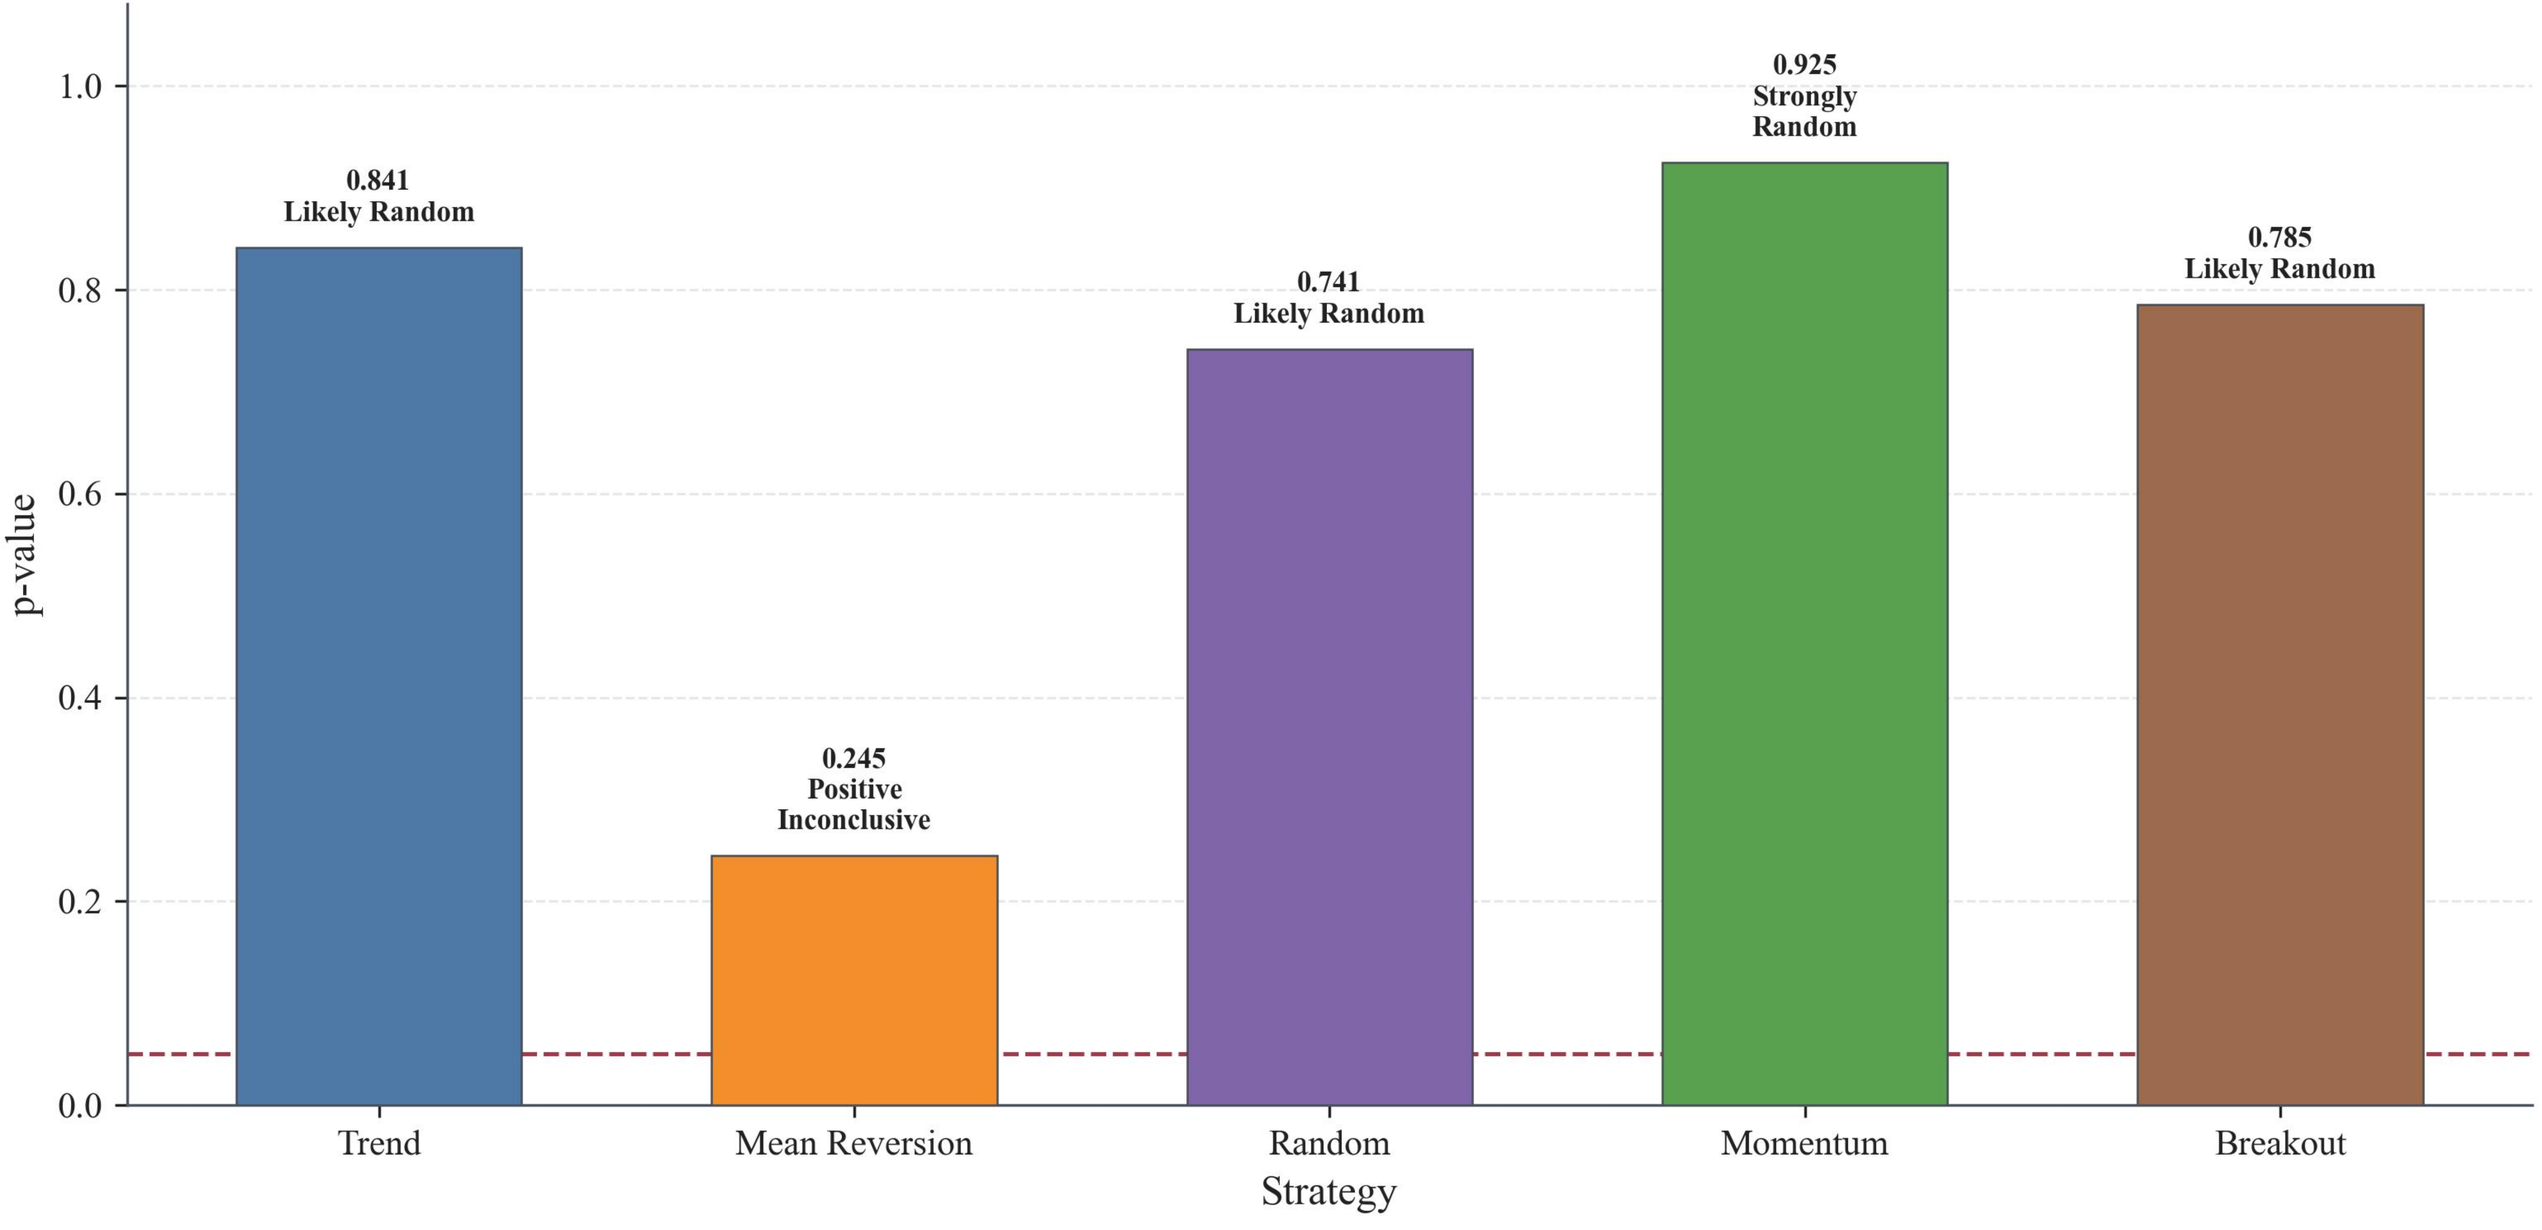
DIA: Monte Carlo Robustness of RCSI Across Seeds



DIA: Monte Carlo Robustness of Actual Percentile Across Seeds

Higher values place the observed outcome deeper into the right tail of the simulated distribution.



DIA: Monte Carlo p-Value by Strategy


The dashed line marks p = 0.05. Lower values indicate stronger evidence against the simulated-random baseline. Labels show the overall evidence class.
