AAPL: Strategy Evidence and Confidence Overview

Evidence labels use scale-free statistics: p-value, percentile, normalized RCSI, robustness, and stability.

Strategy	Evidence	Verdict	Confidence	p-value	Prom.	Pctile	RCSI_z
Trend	Likely Random	Luck	Moderate	1.000	0.00	0.0	-0.42
Mean Reversion	Likely Random	Luck	Moderate	1.000	-0.00	0.0	-0.64
Random	Likely Random	Luck	Moderate	0.971	0.01	2.9	-0.41
Momentum	Likely Random	Luck	Moderate	1.000	0.00	0.0	-0.42
Breakout	Null-Like / Inconclusive	Inconclusive	Low	0.614	0.21	38.6	-0.32

Interpretation:
Prom. = -log10(p), so larger values indicate rarer outcomes under the null.
Pctile and RCSI_z provide scale-free evidence and are more comparable across tickers.
Benchmark context appears in the comparison table and equity curve rather than this verdict summary.

Null-Like
Inconclusive
Positive RCSI indicates performance above the simulated baseline (skill).
Negative RCSI suggests performance consistent with or below randomness.
Labels show the overall evidence class, not RCSI alone.

AAPL: Trade-Level Return Ratio by Strategy and Market Regime
Gray hatched bars are suppressed because the regime cell has fewer than 20 trades.

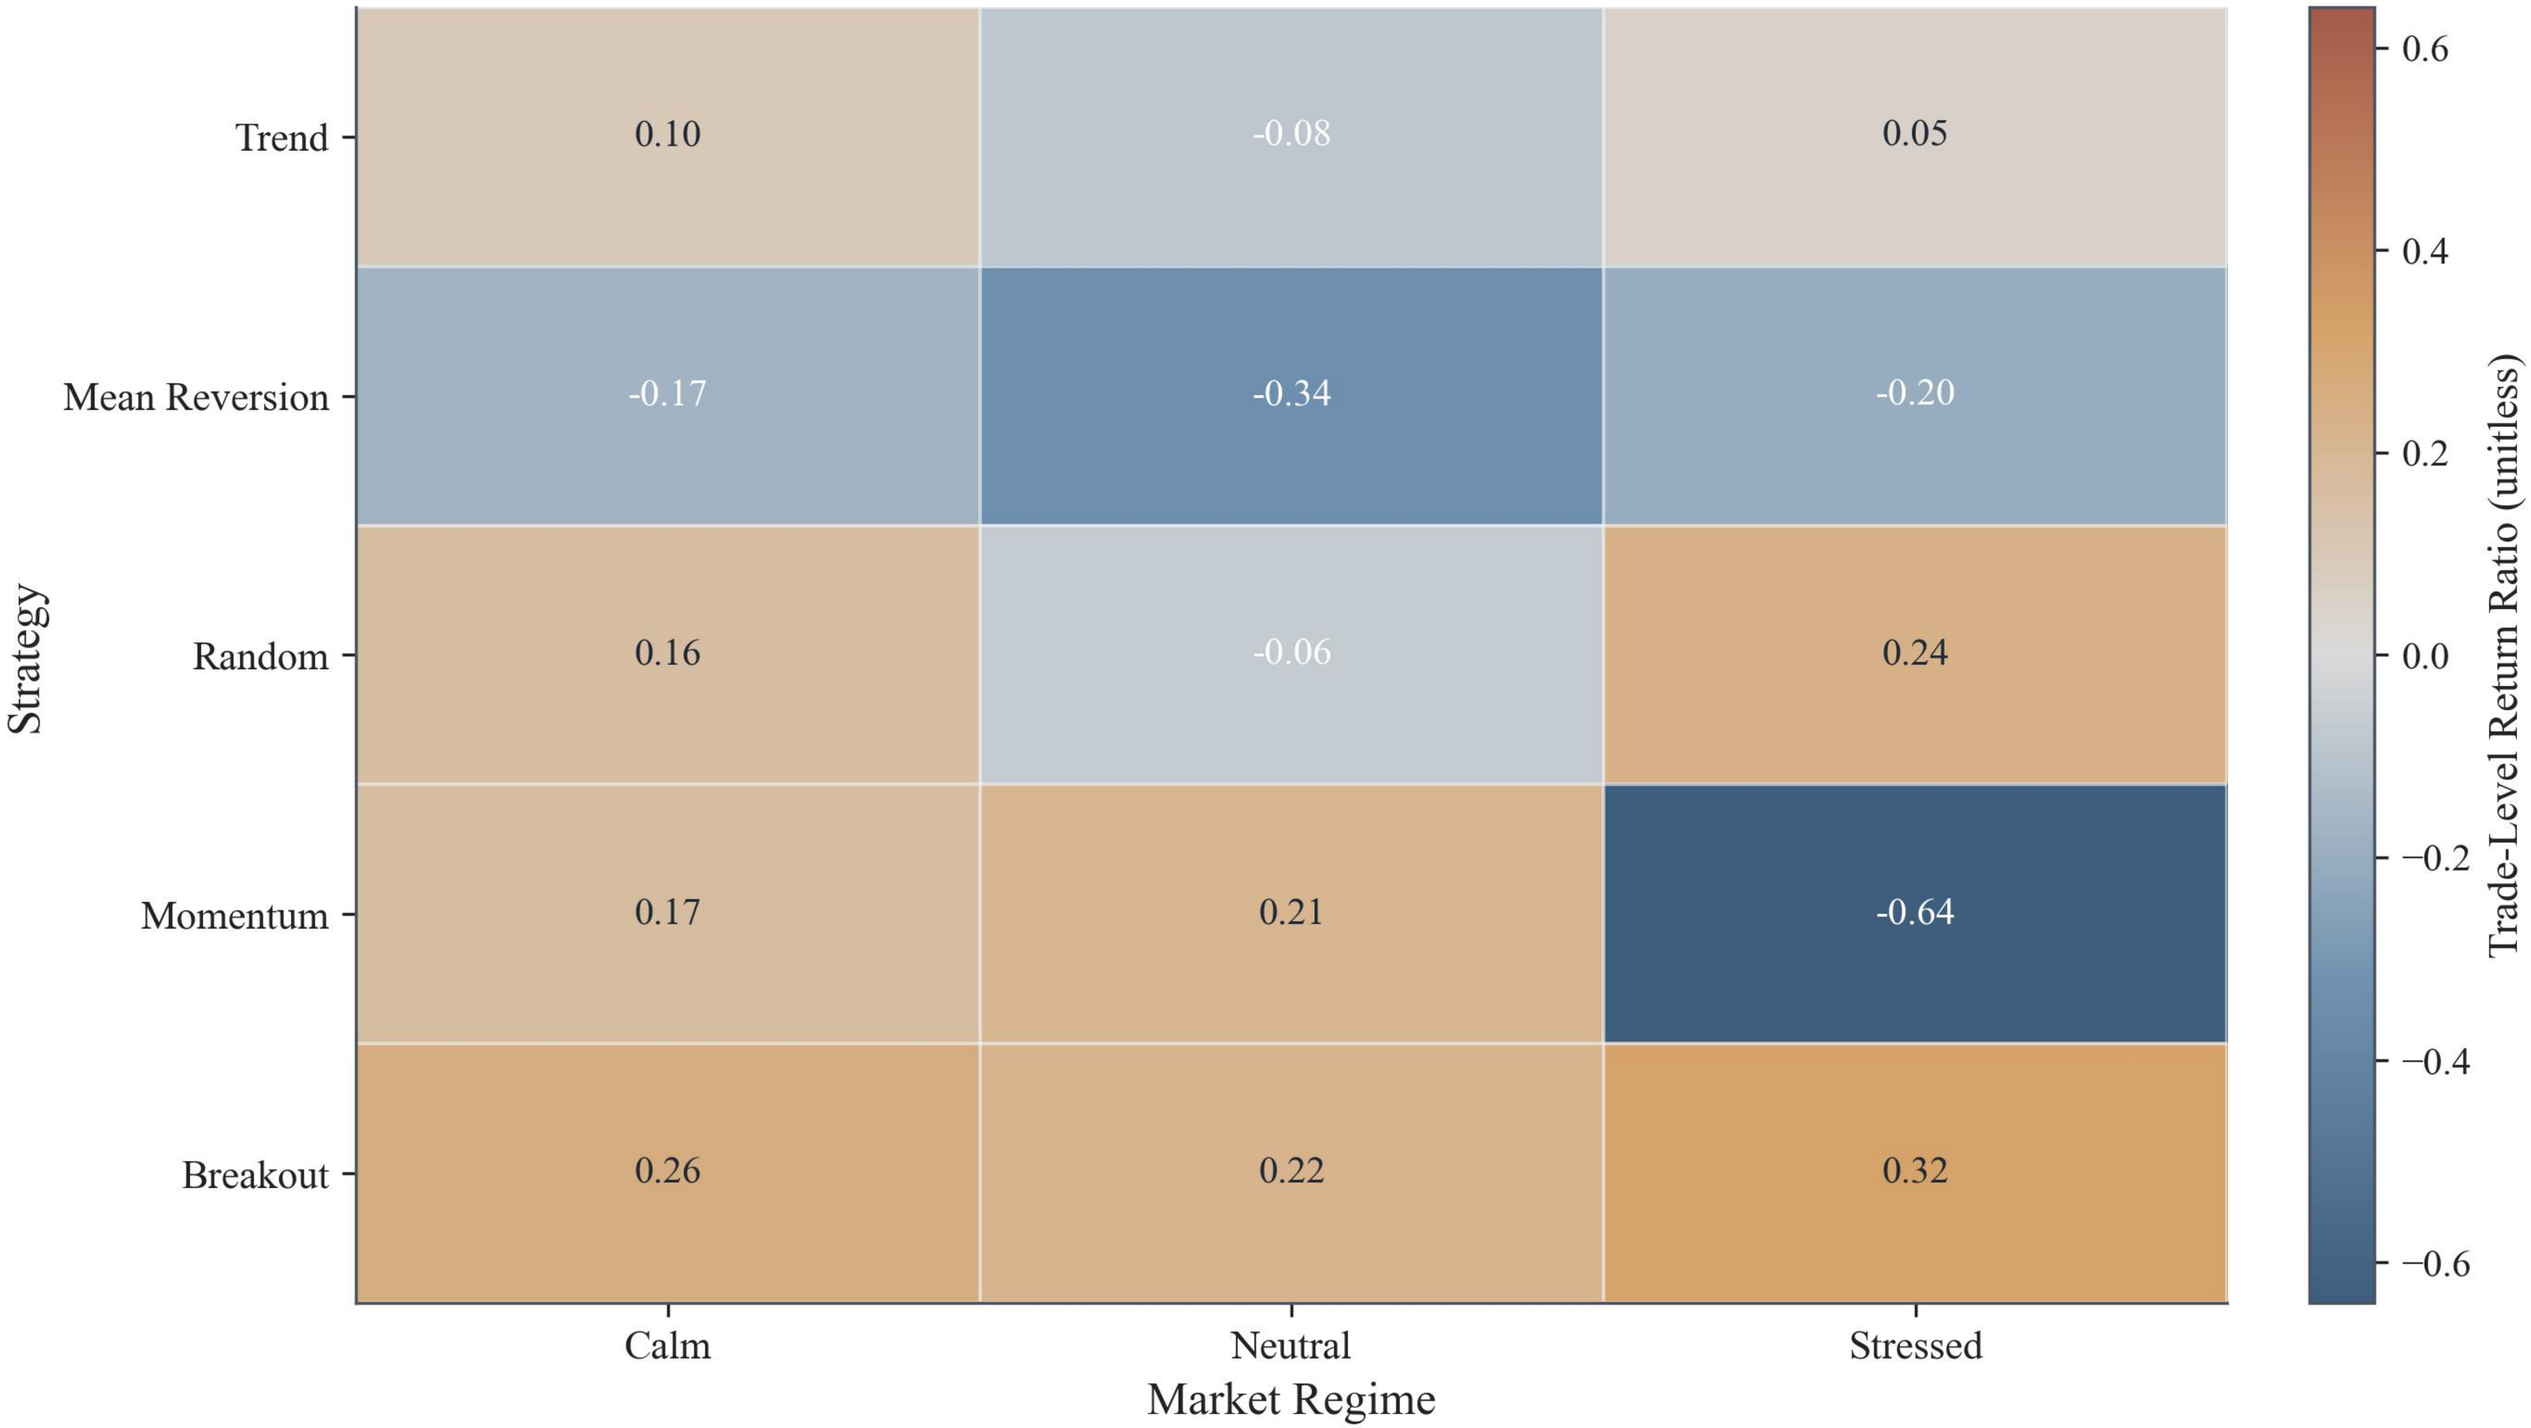
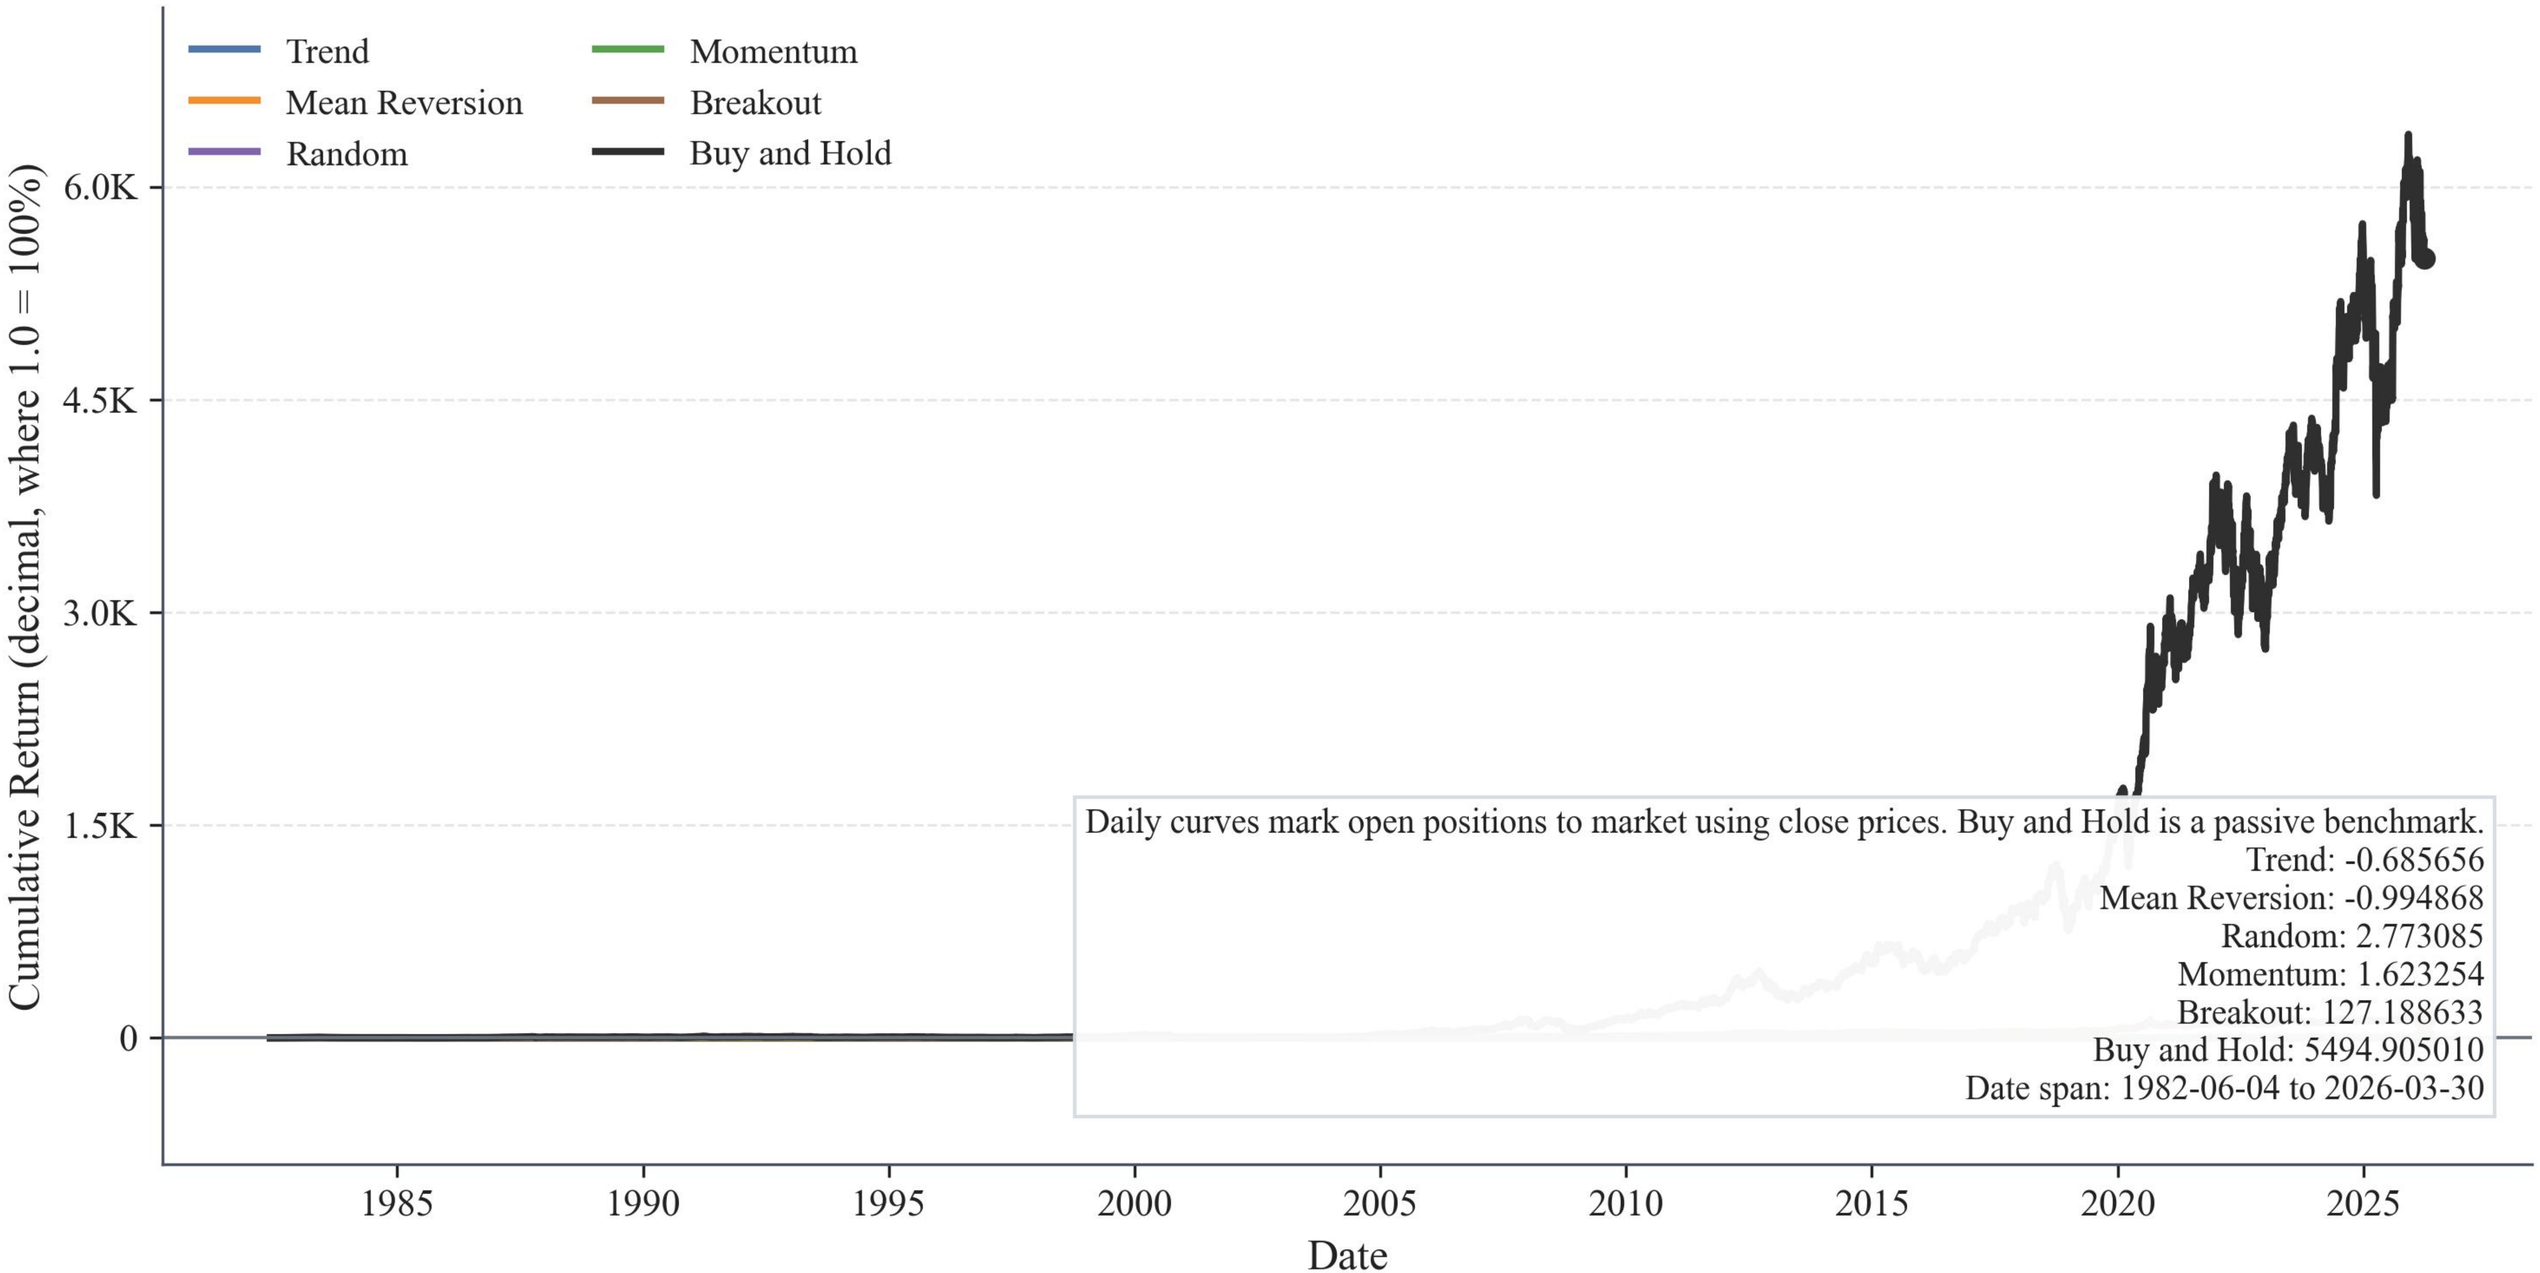
AAPL: Strategy Performance Across Market Regimes

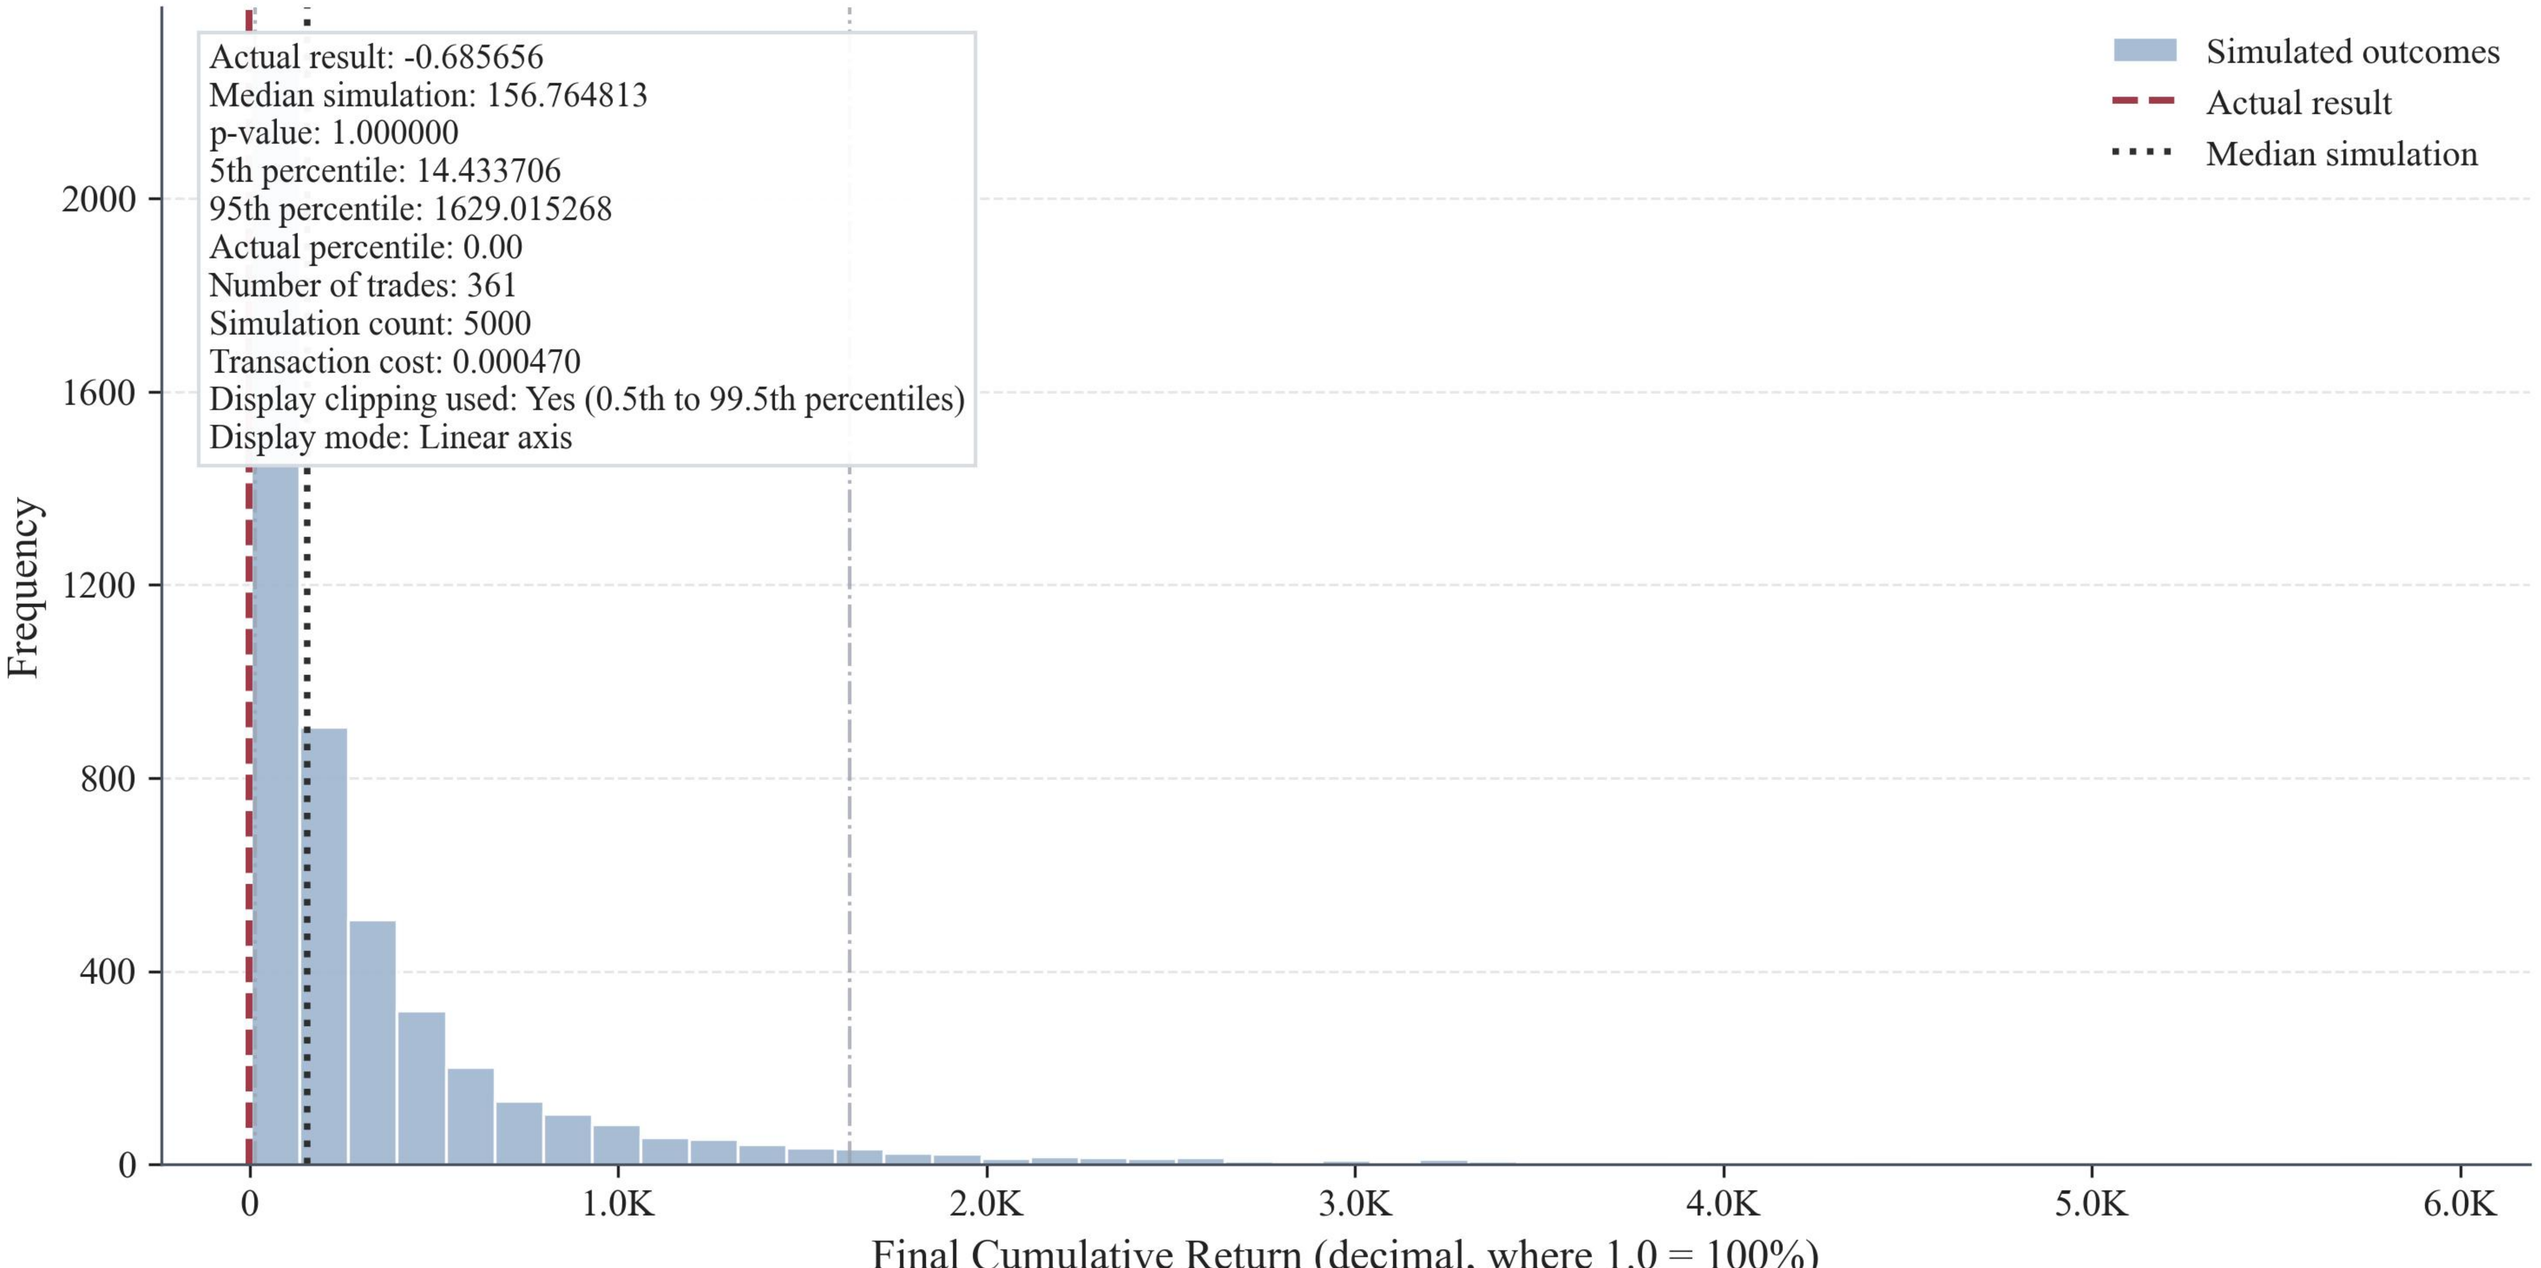
Gray cells are suppressed because the regime cell has fewer than 20 trades.



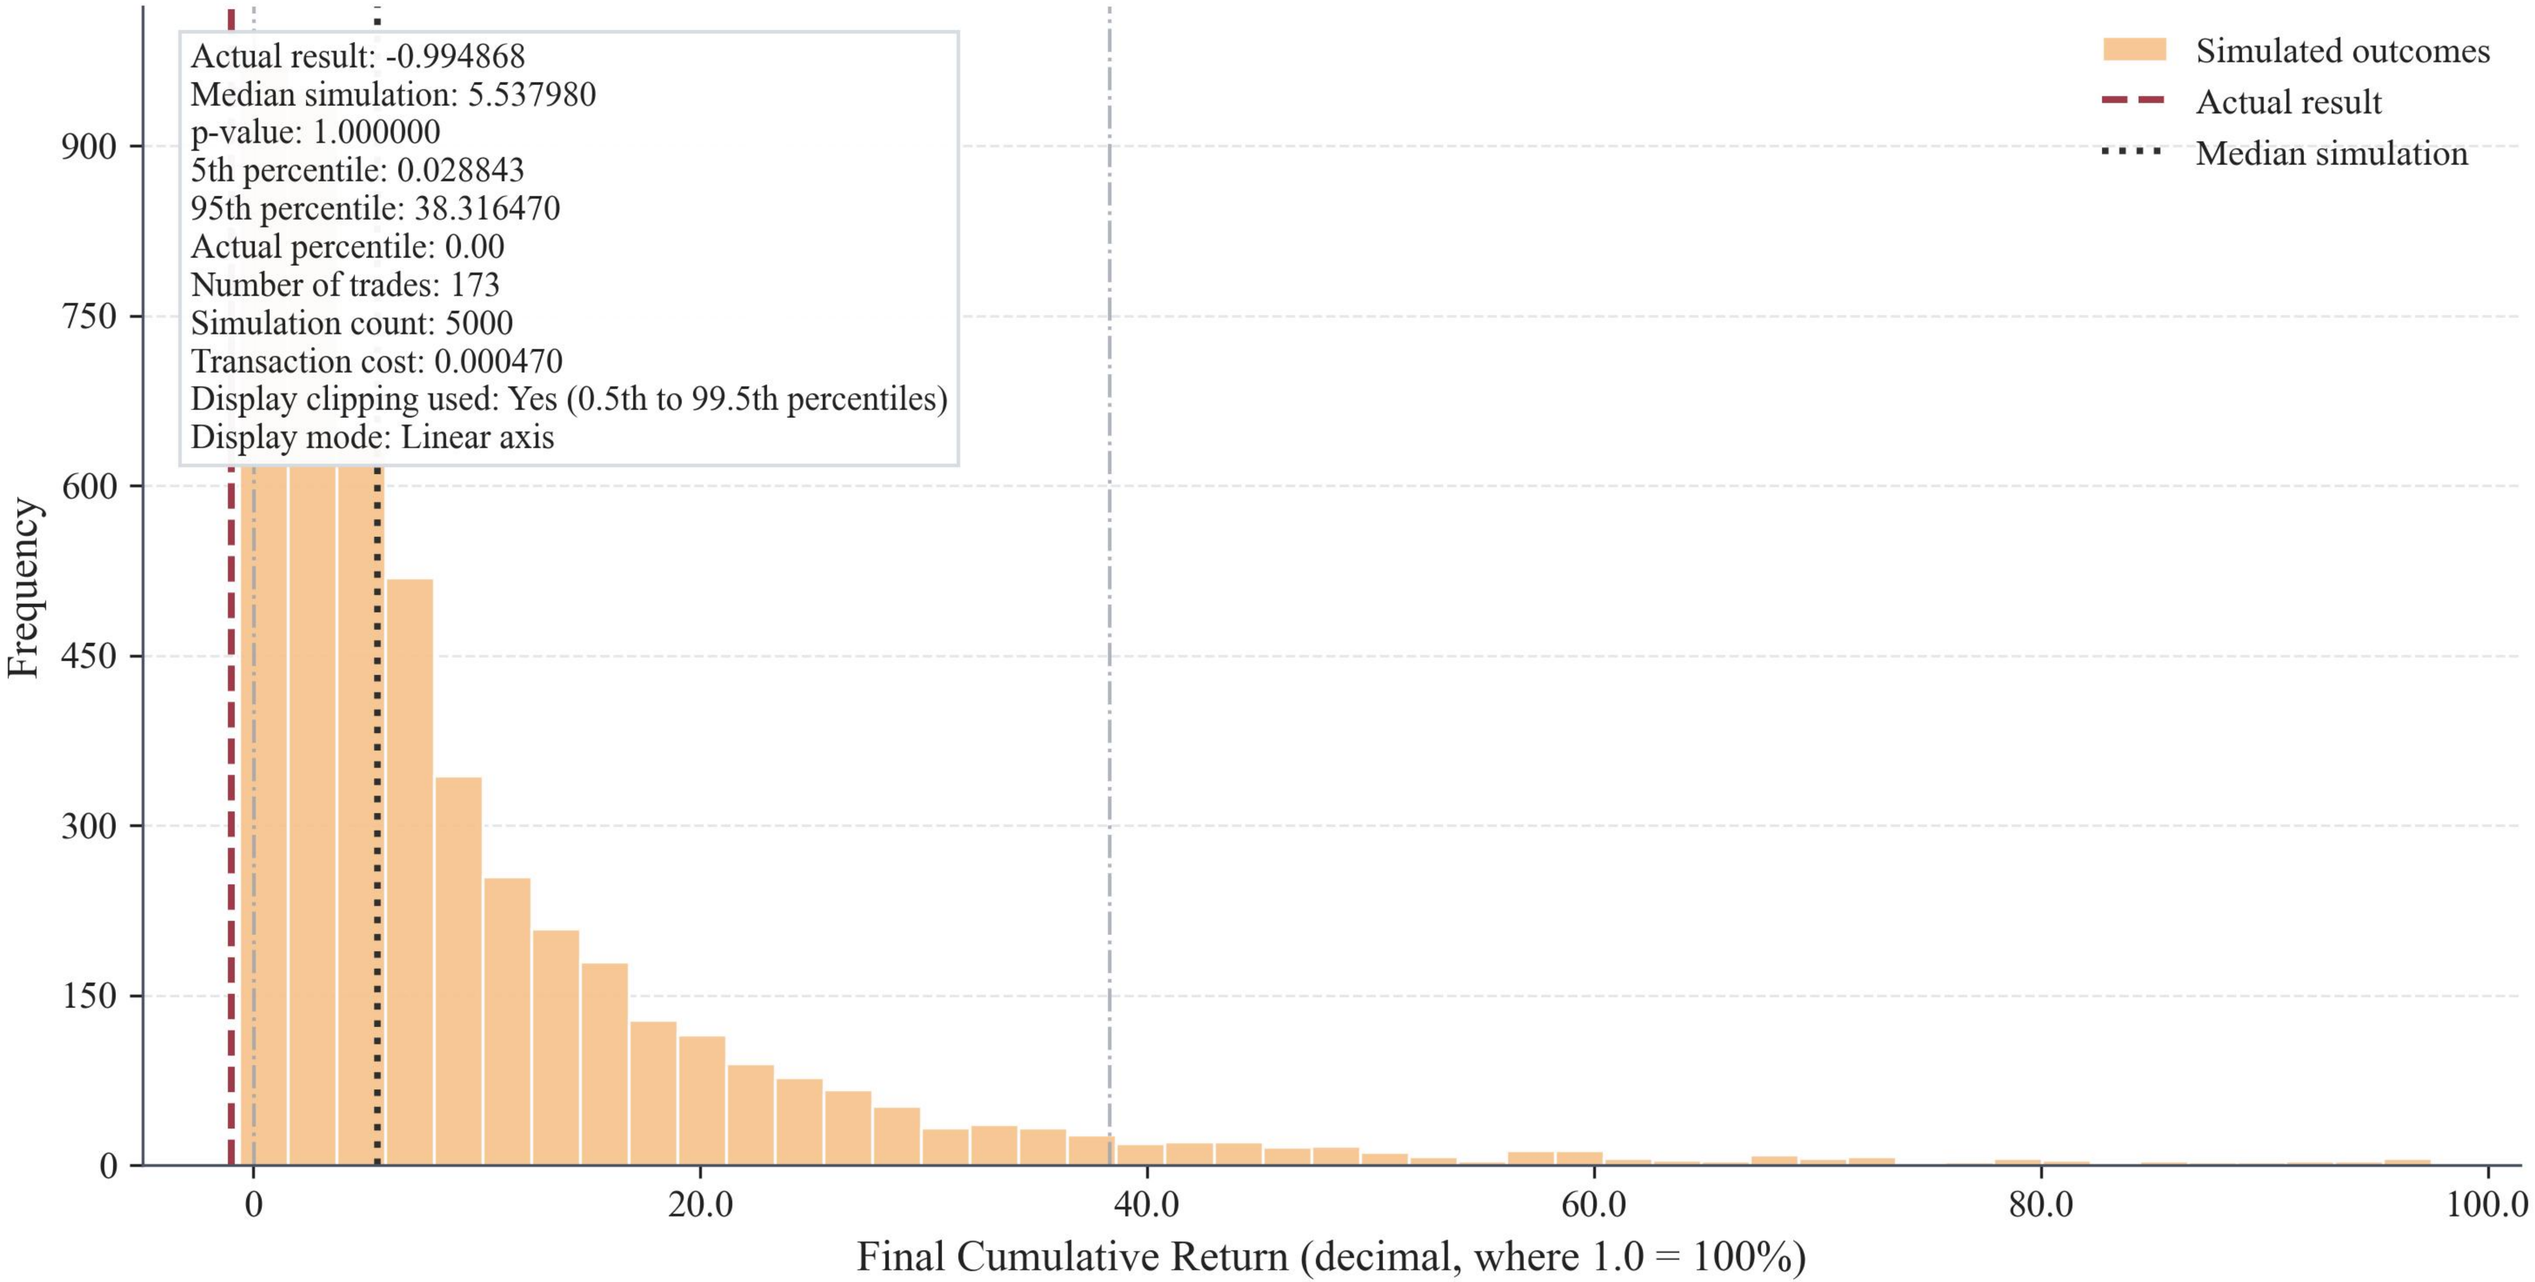
AAPL: Daily Equity Curves by Strategy and Benchmark



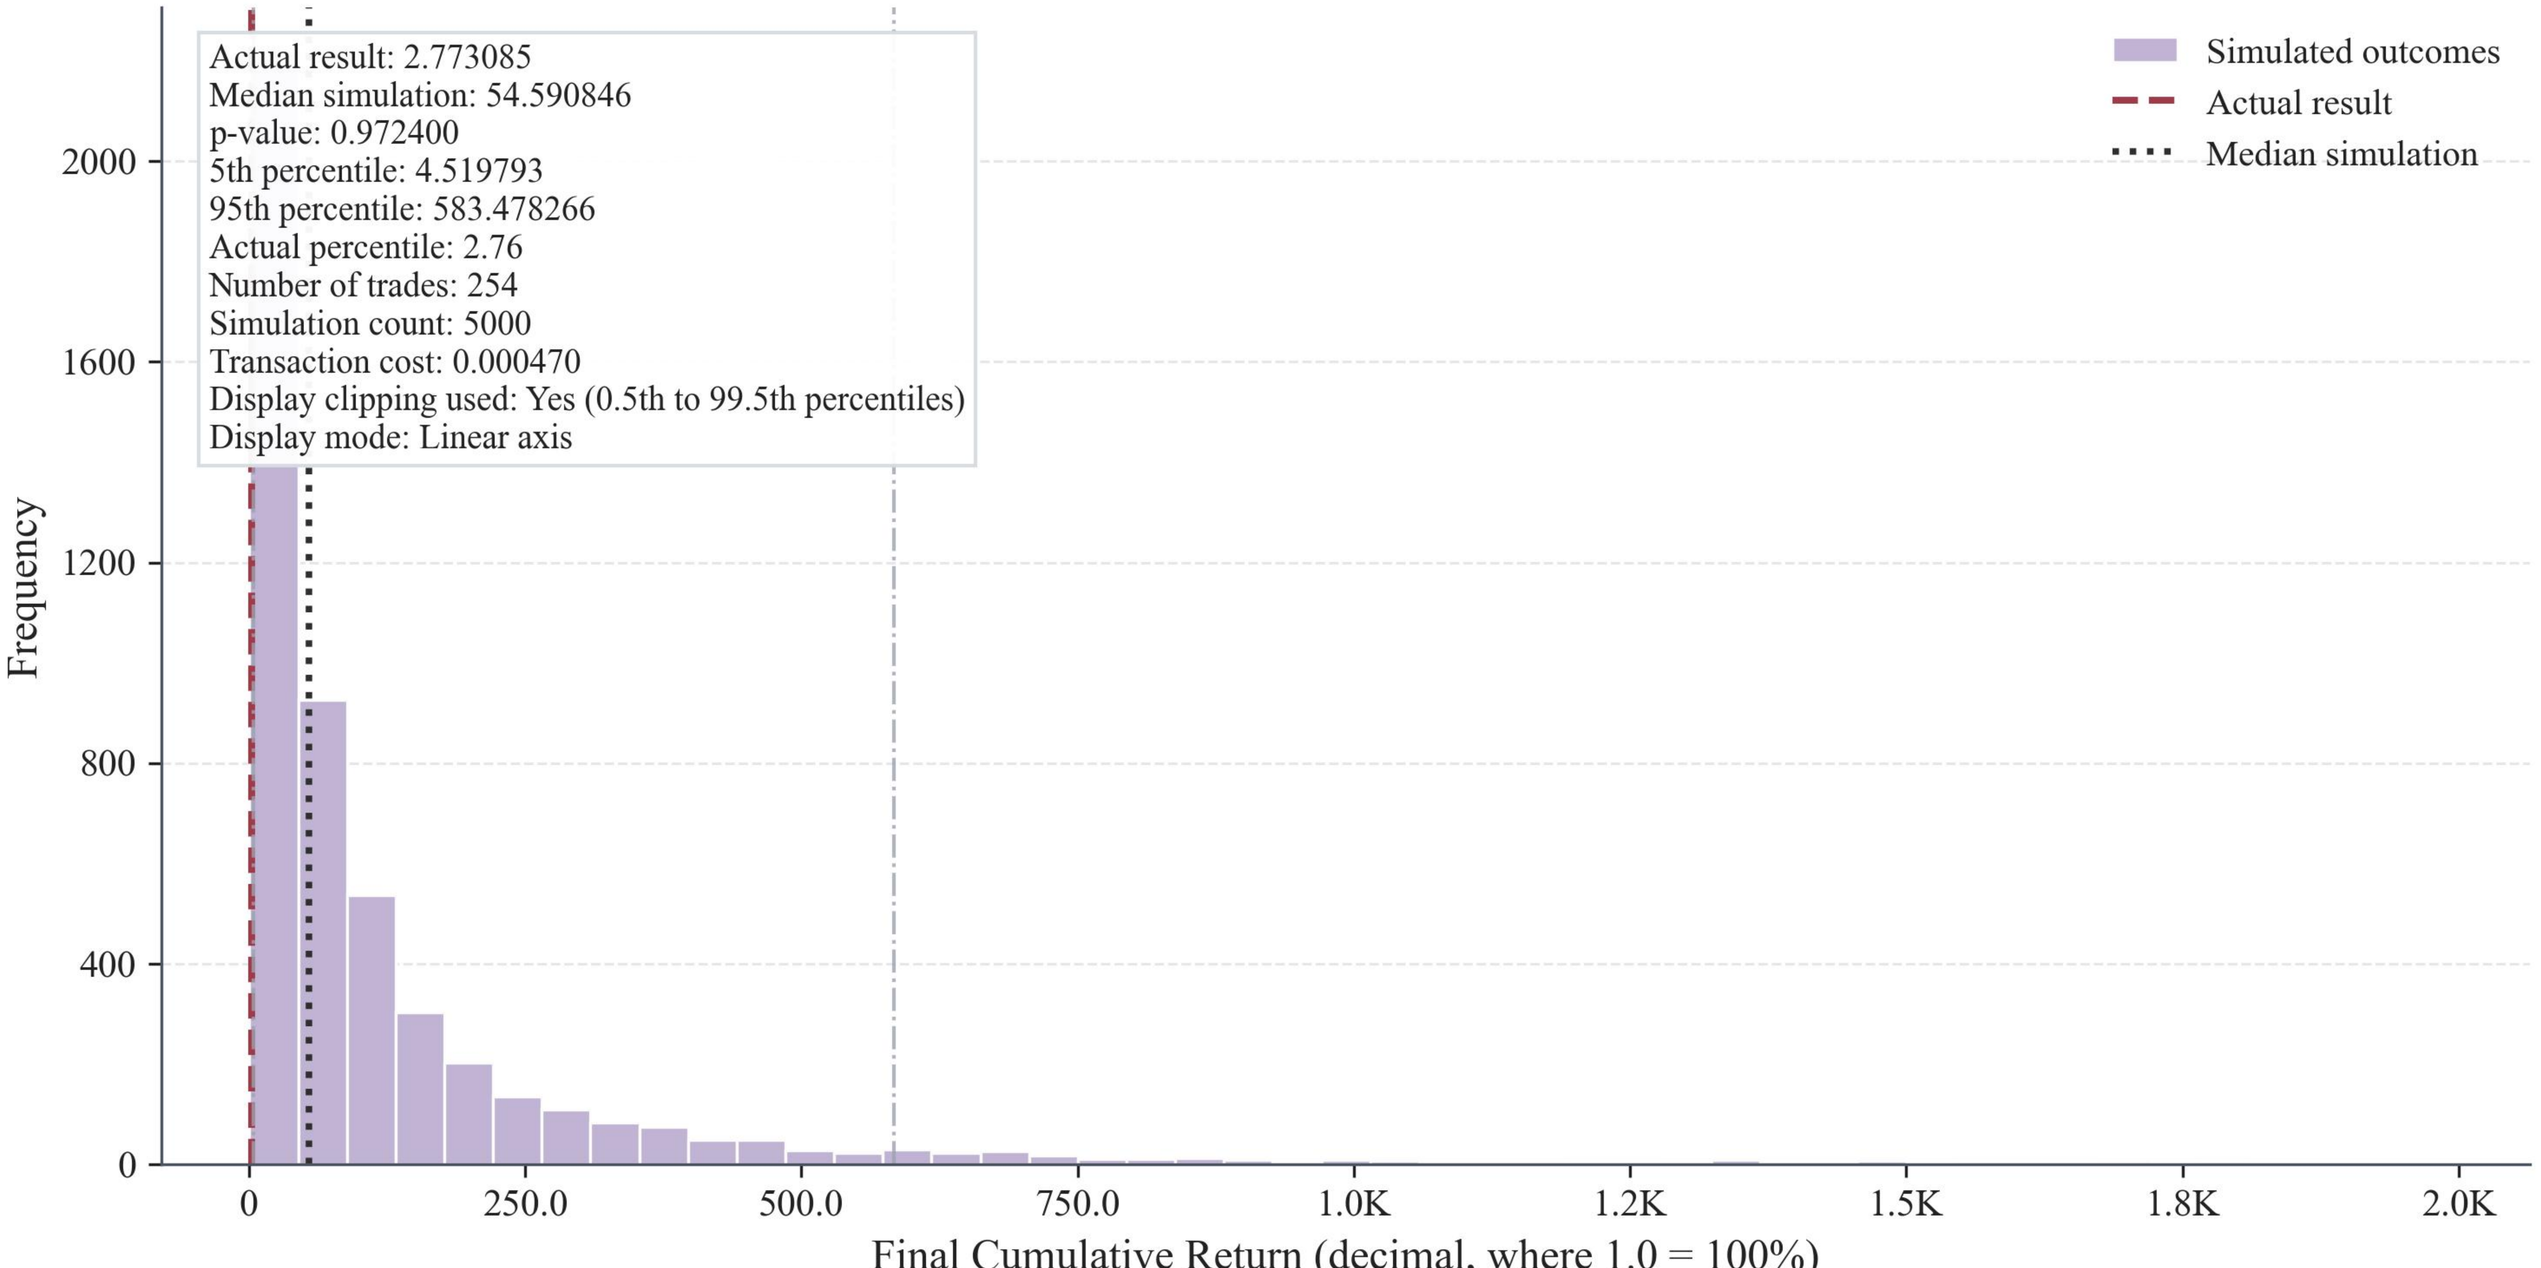
AAPL: Monte Carlo Distribution of Final Returns, Trend Strategy



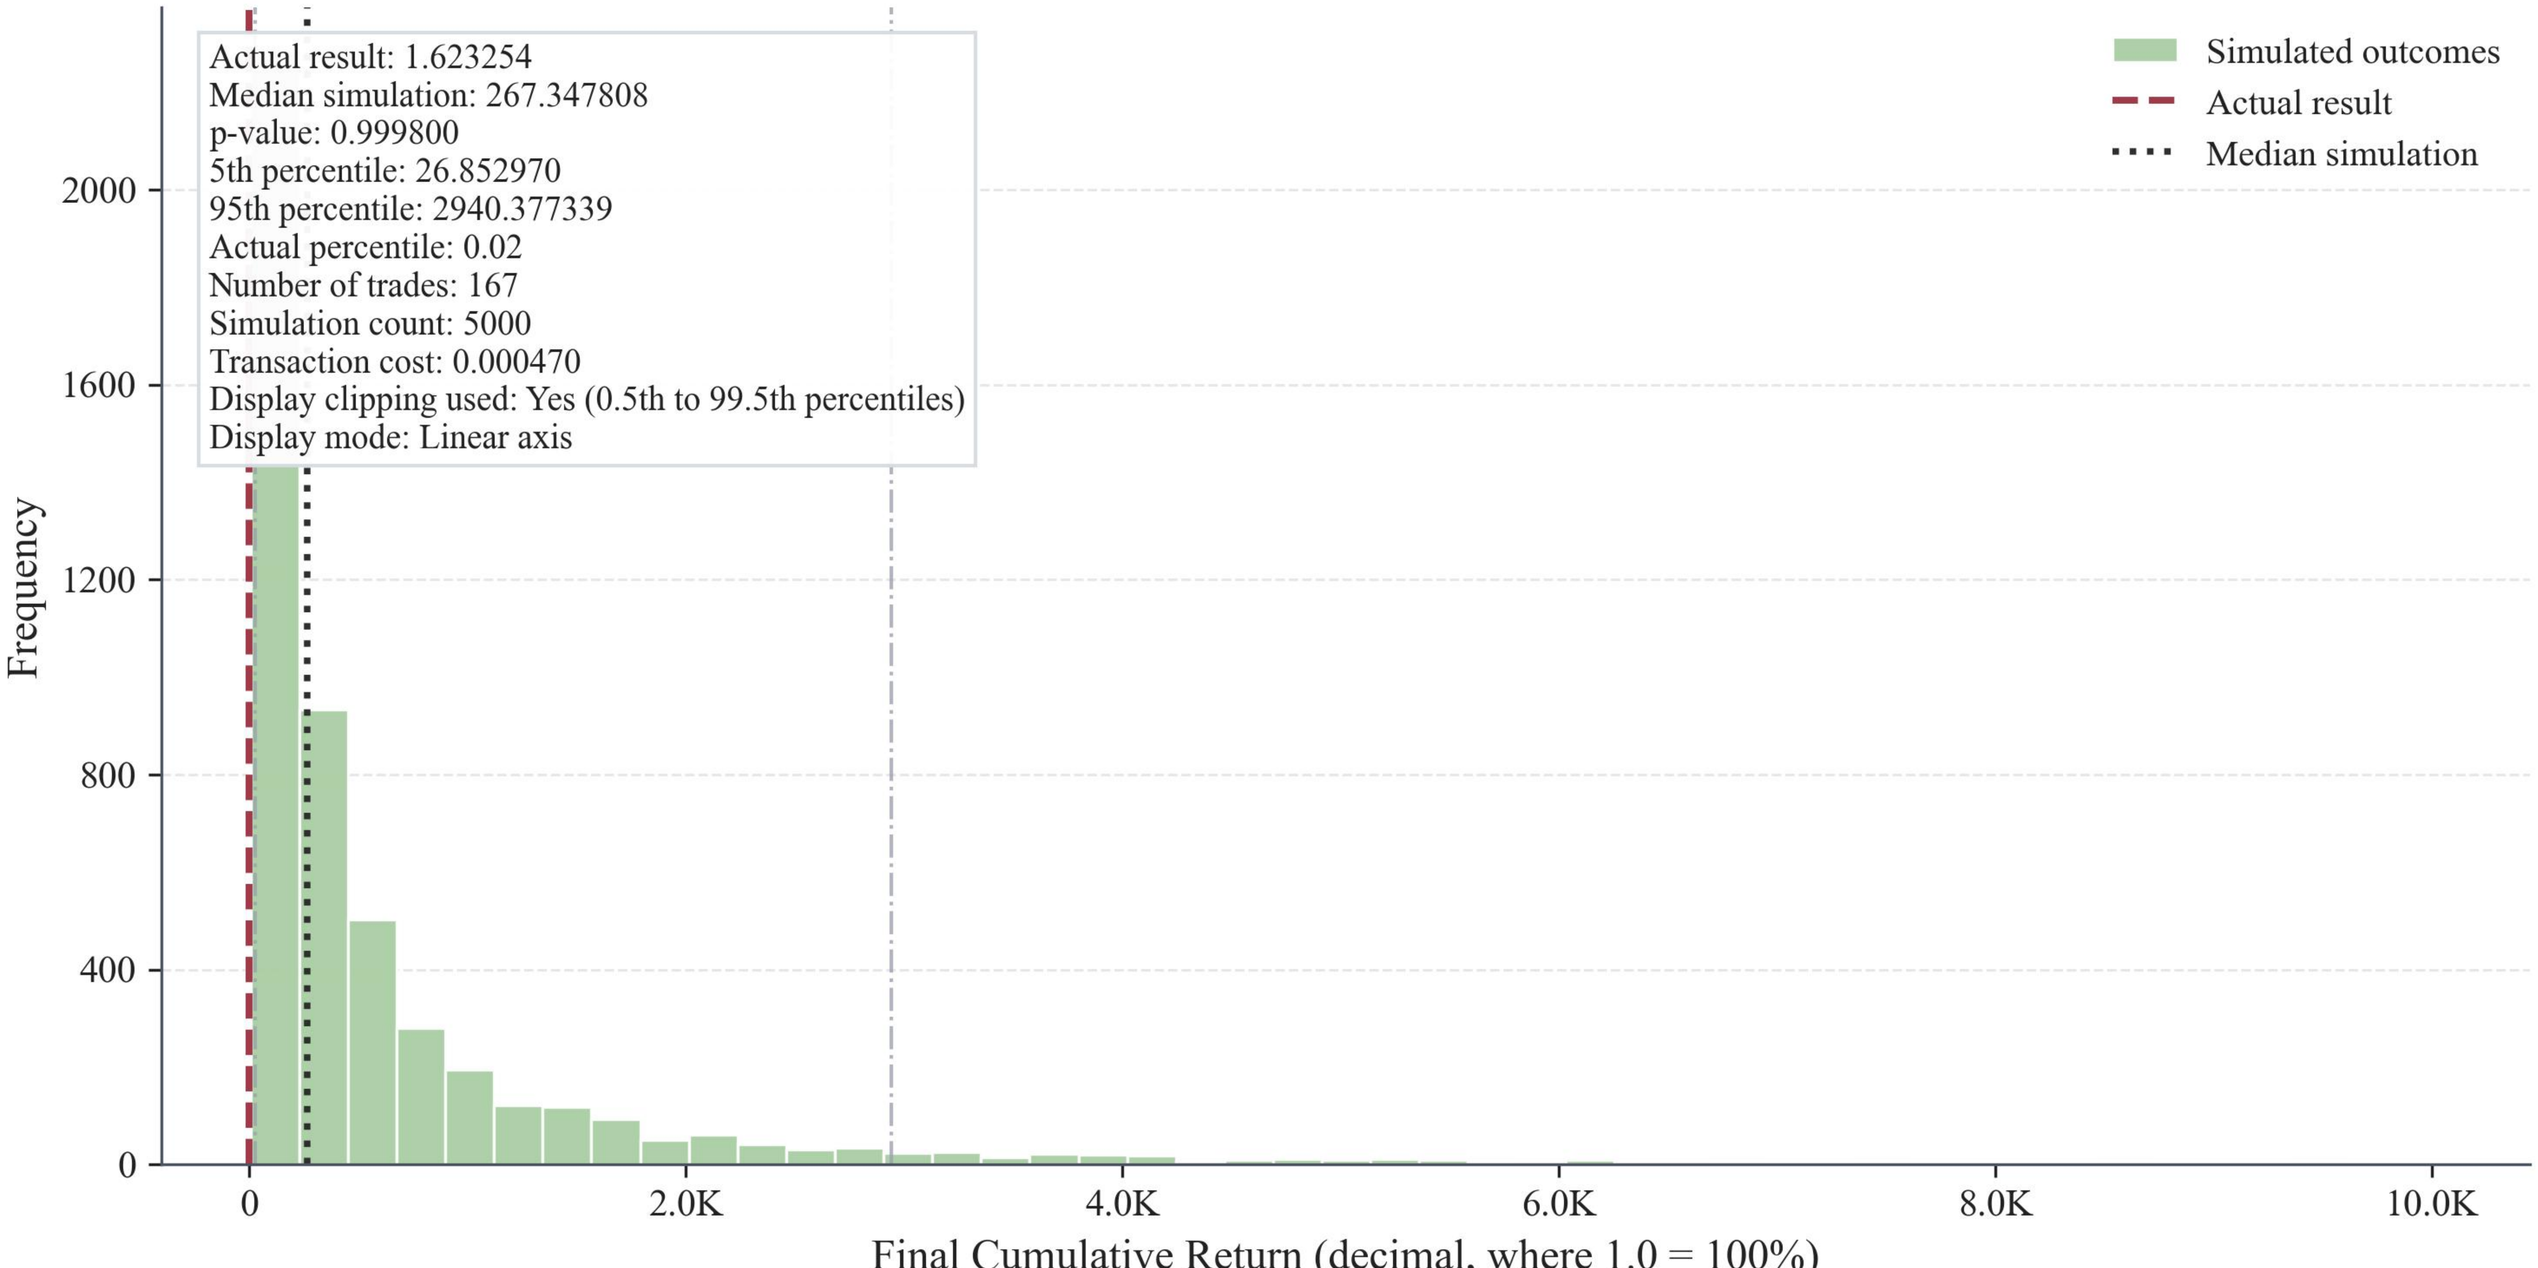
AAPL: Monte Carlo Distribution of Final Returns, Mean Reversion Strategy



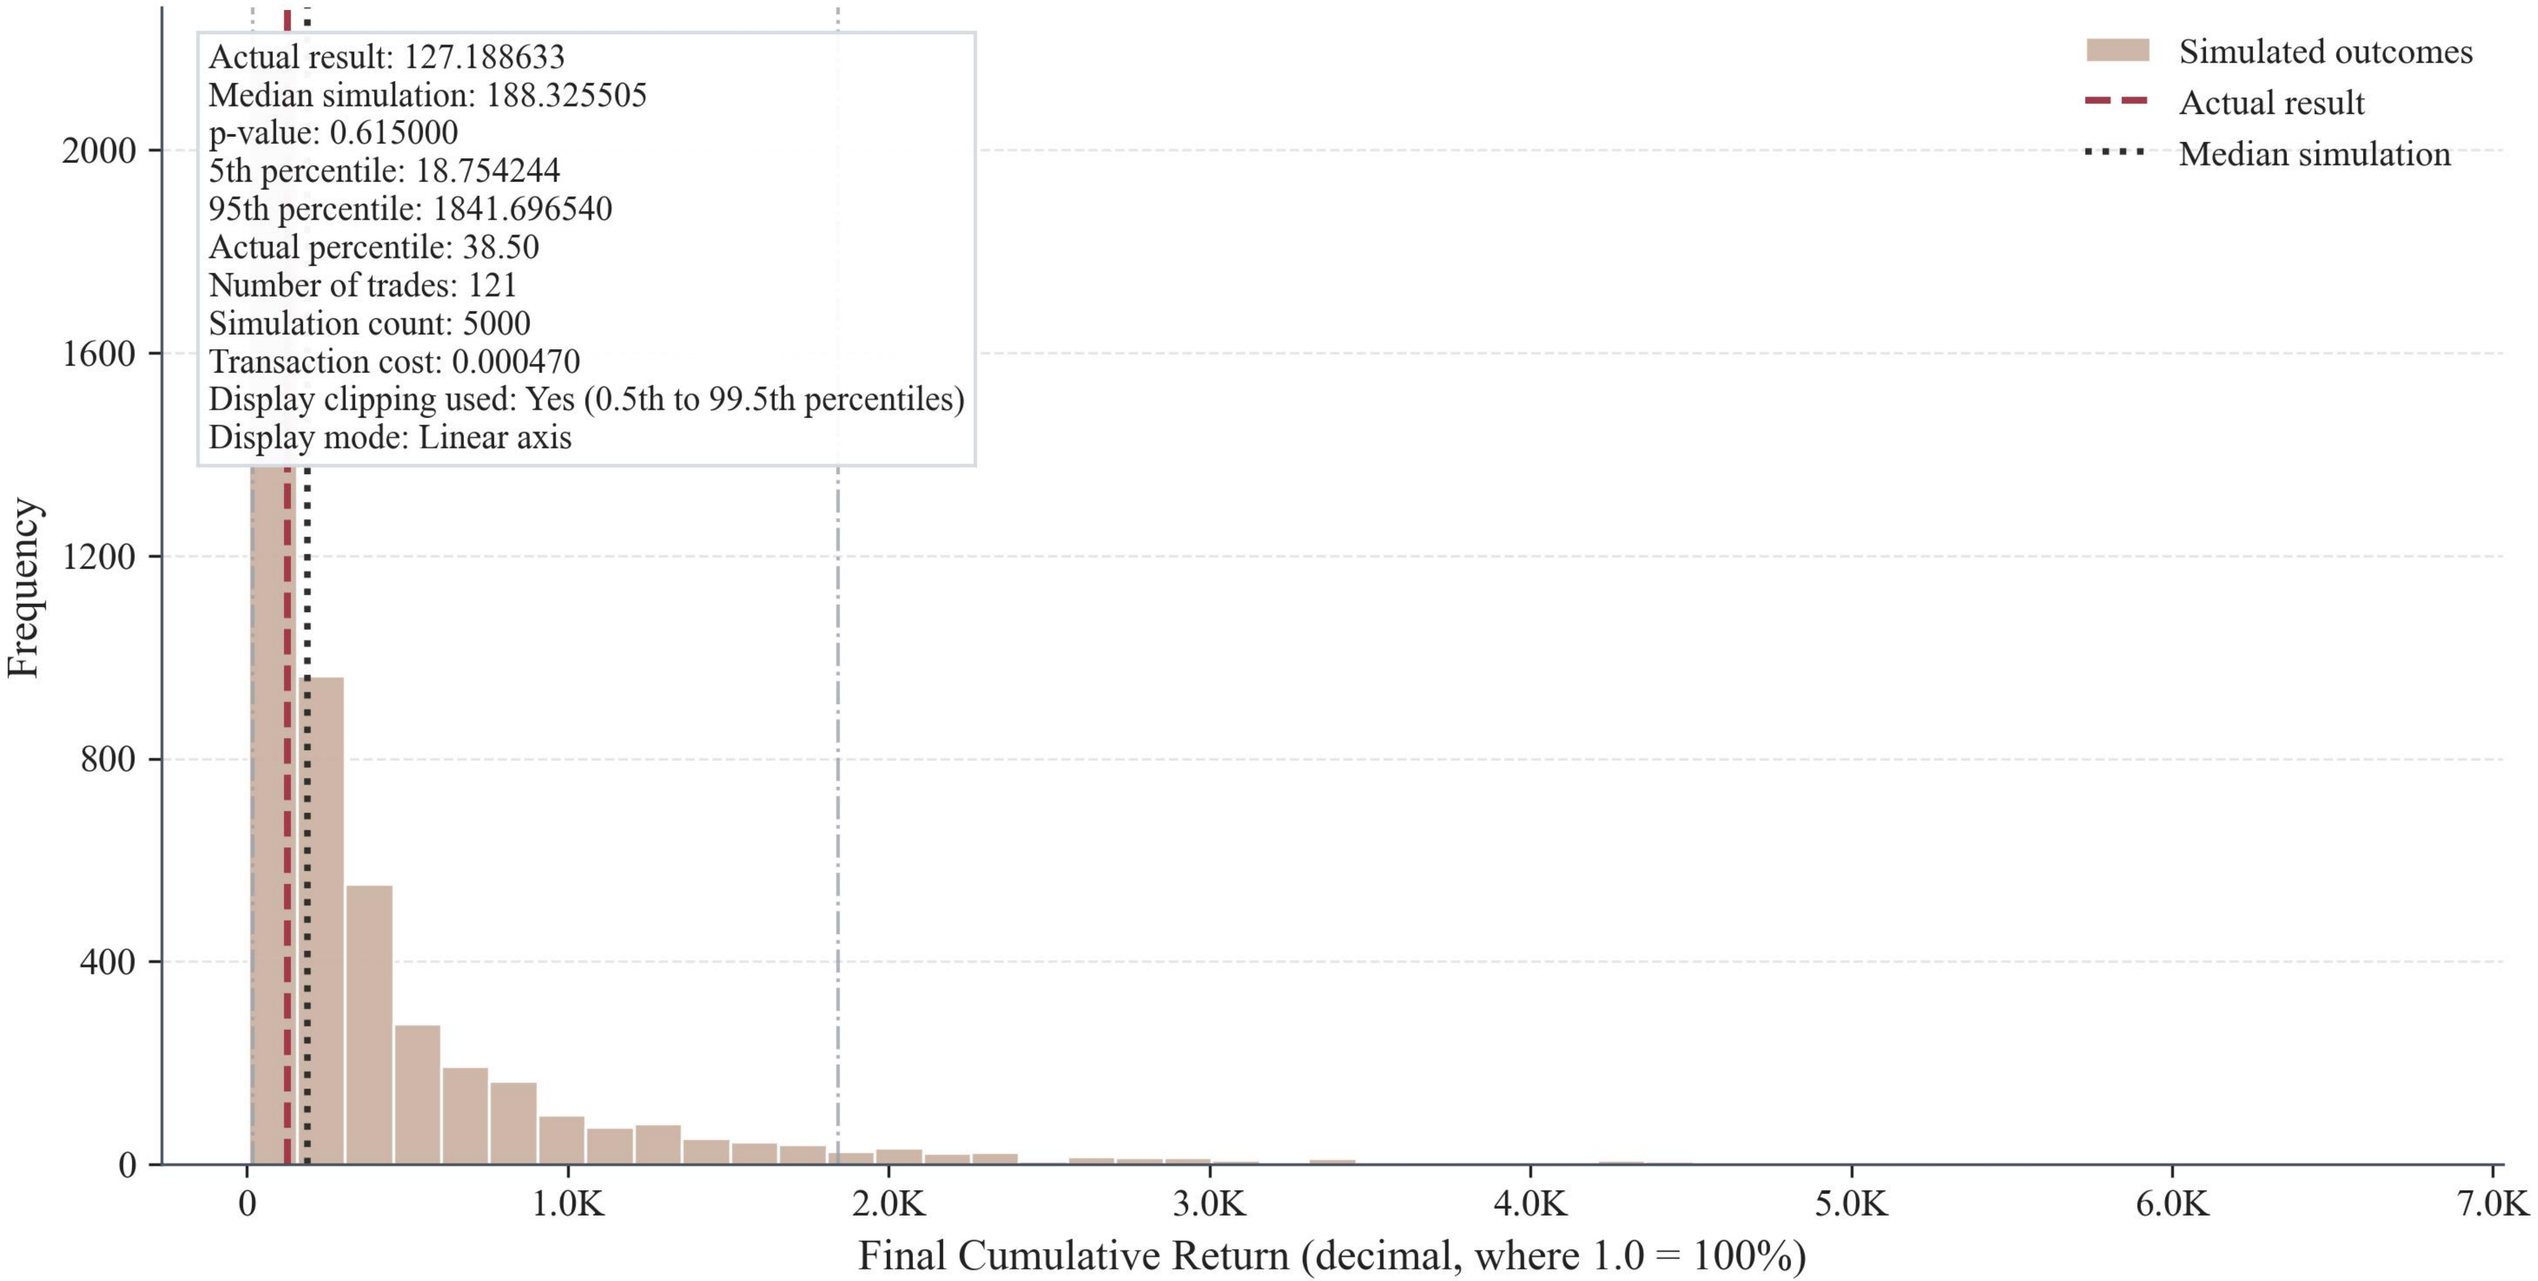
AAPL: Monte Carlo Distribution of Final Returns, Random Strategy



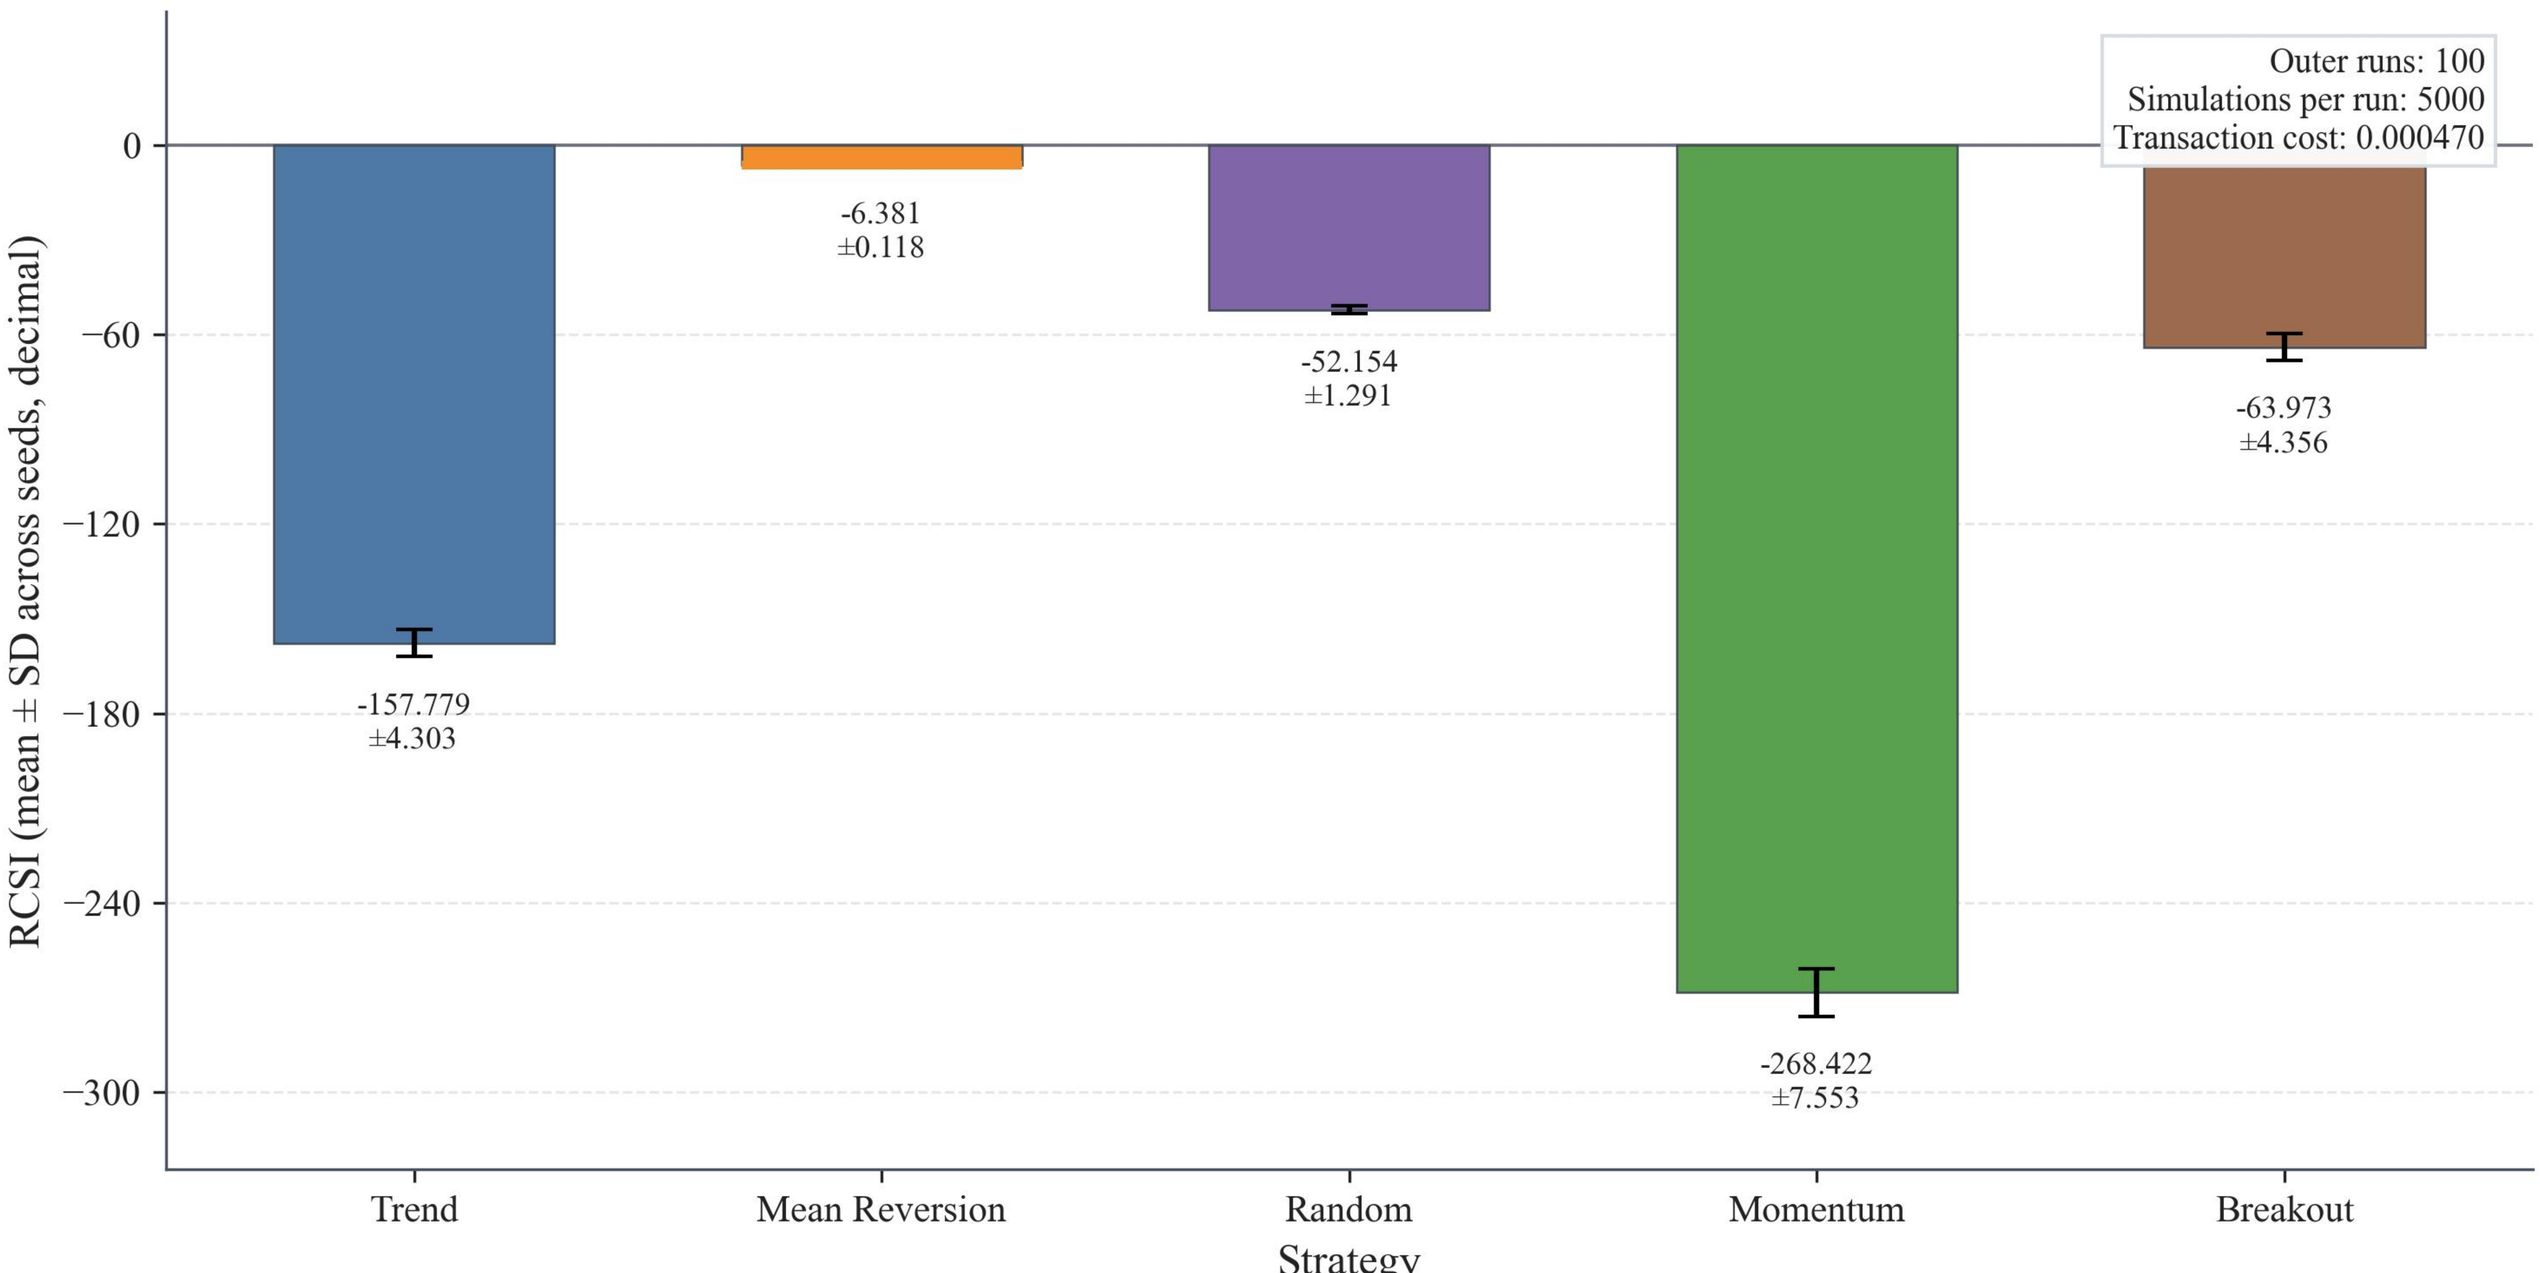
AAPL: Monte Carlo Distribution of Final Returns, Momentum Strategy



AAPL: Monte Carlo Distribution of Final Returns, Breakout Strategy

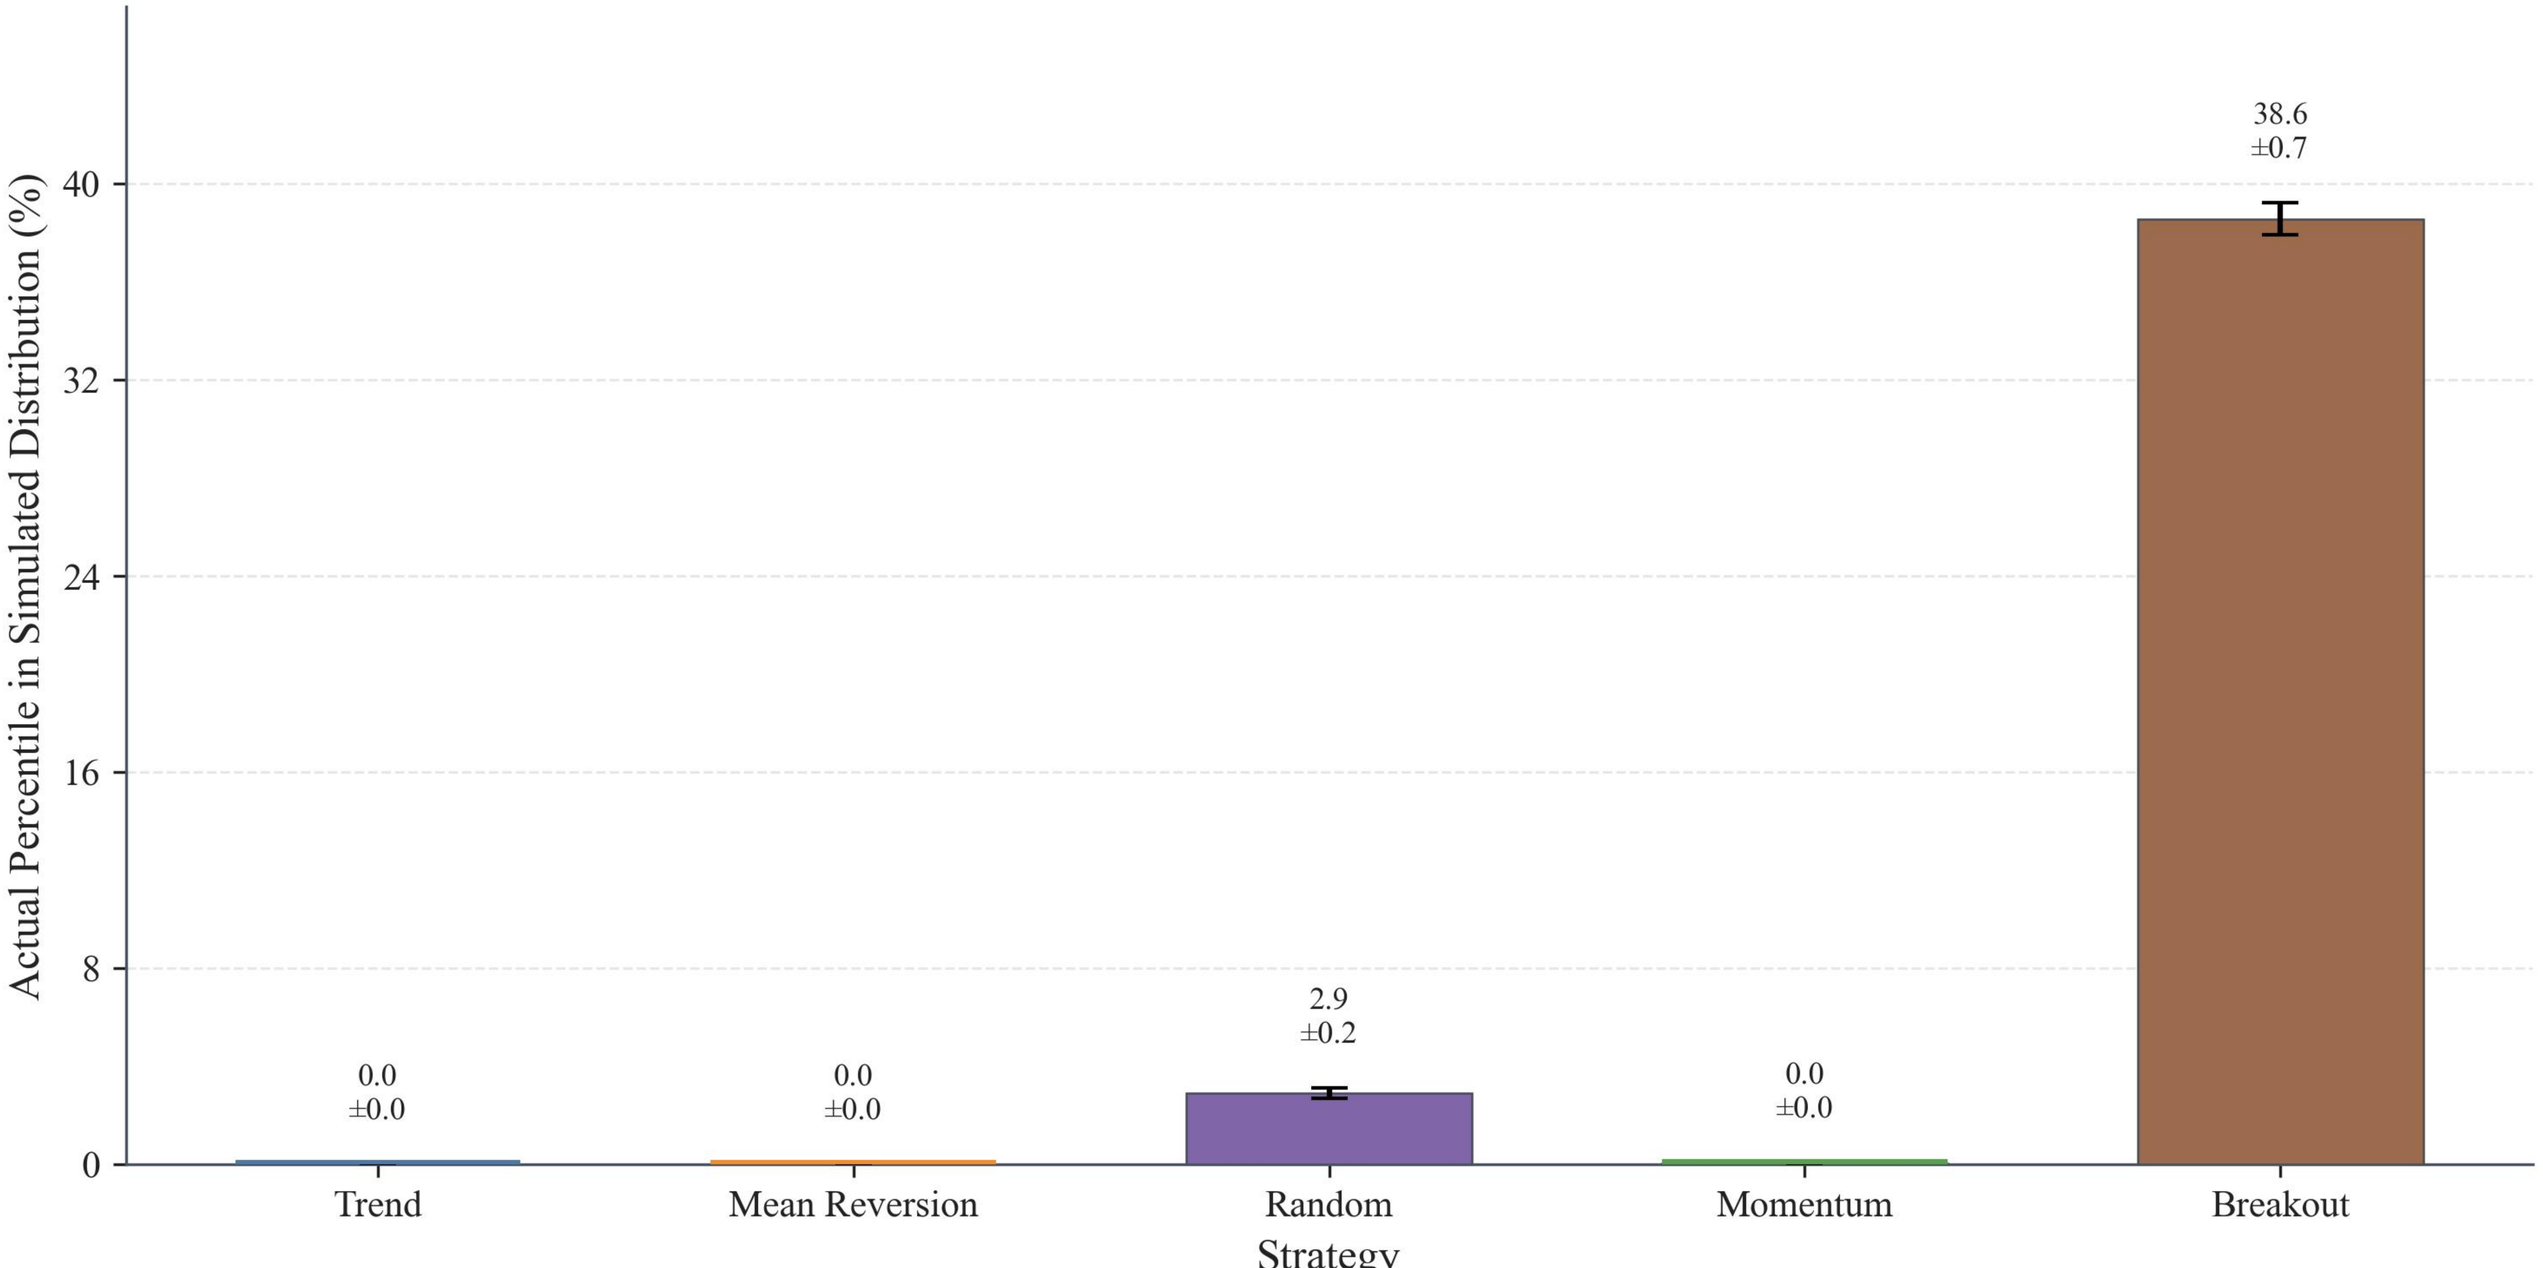


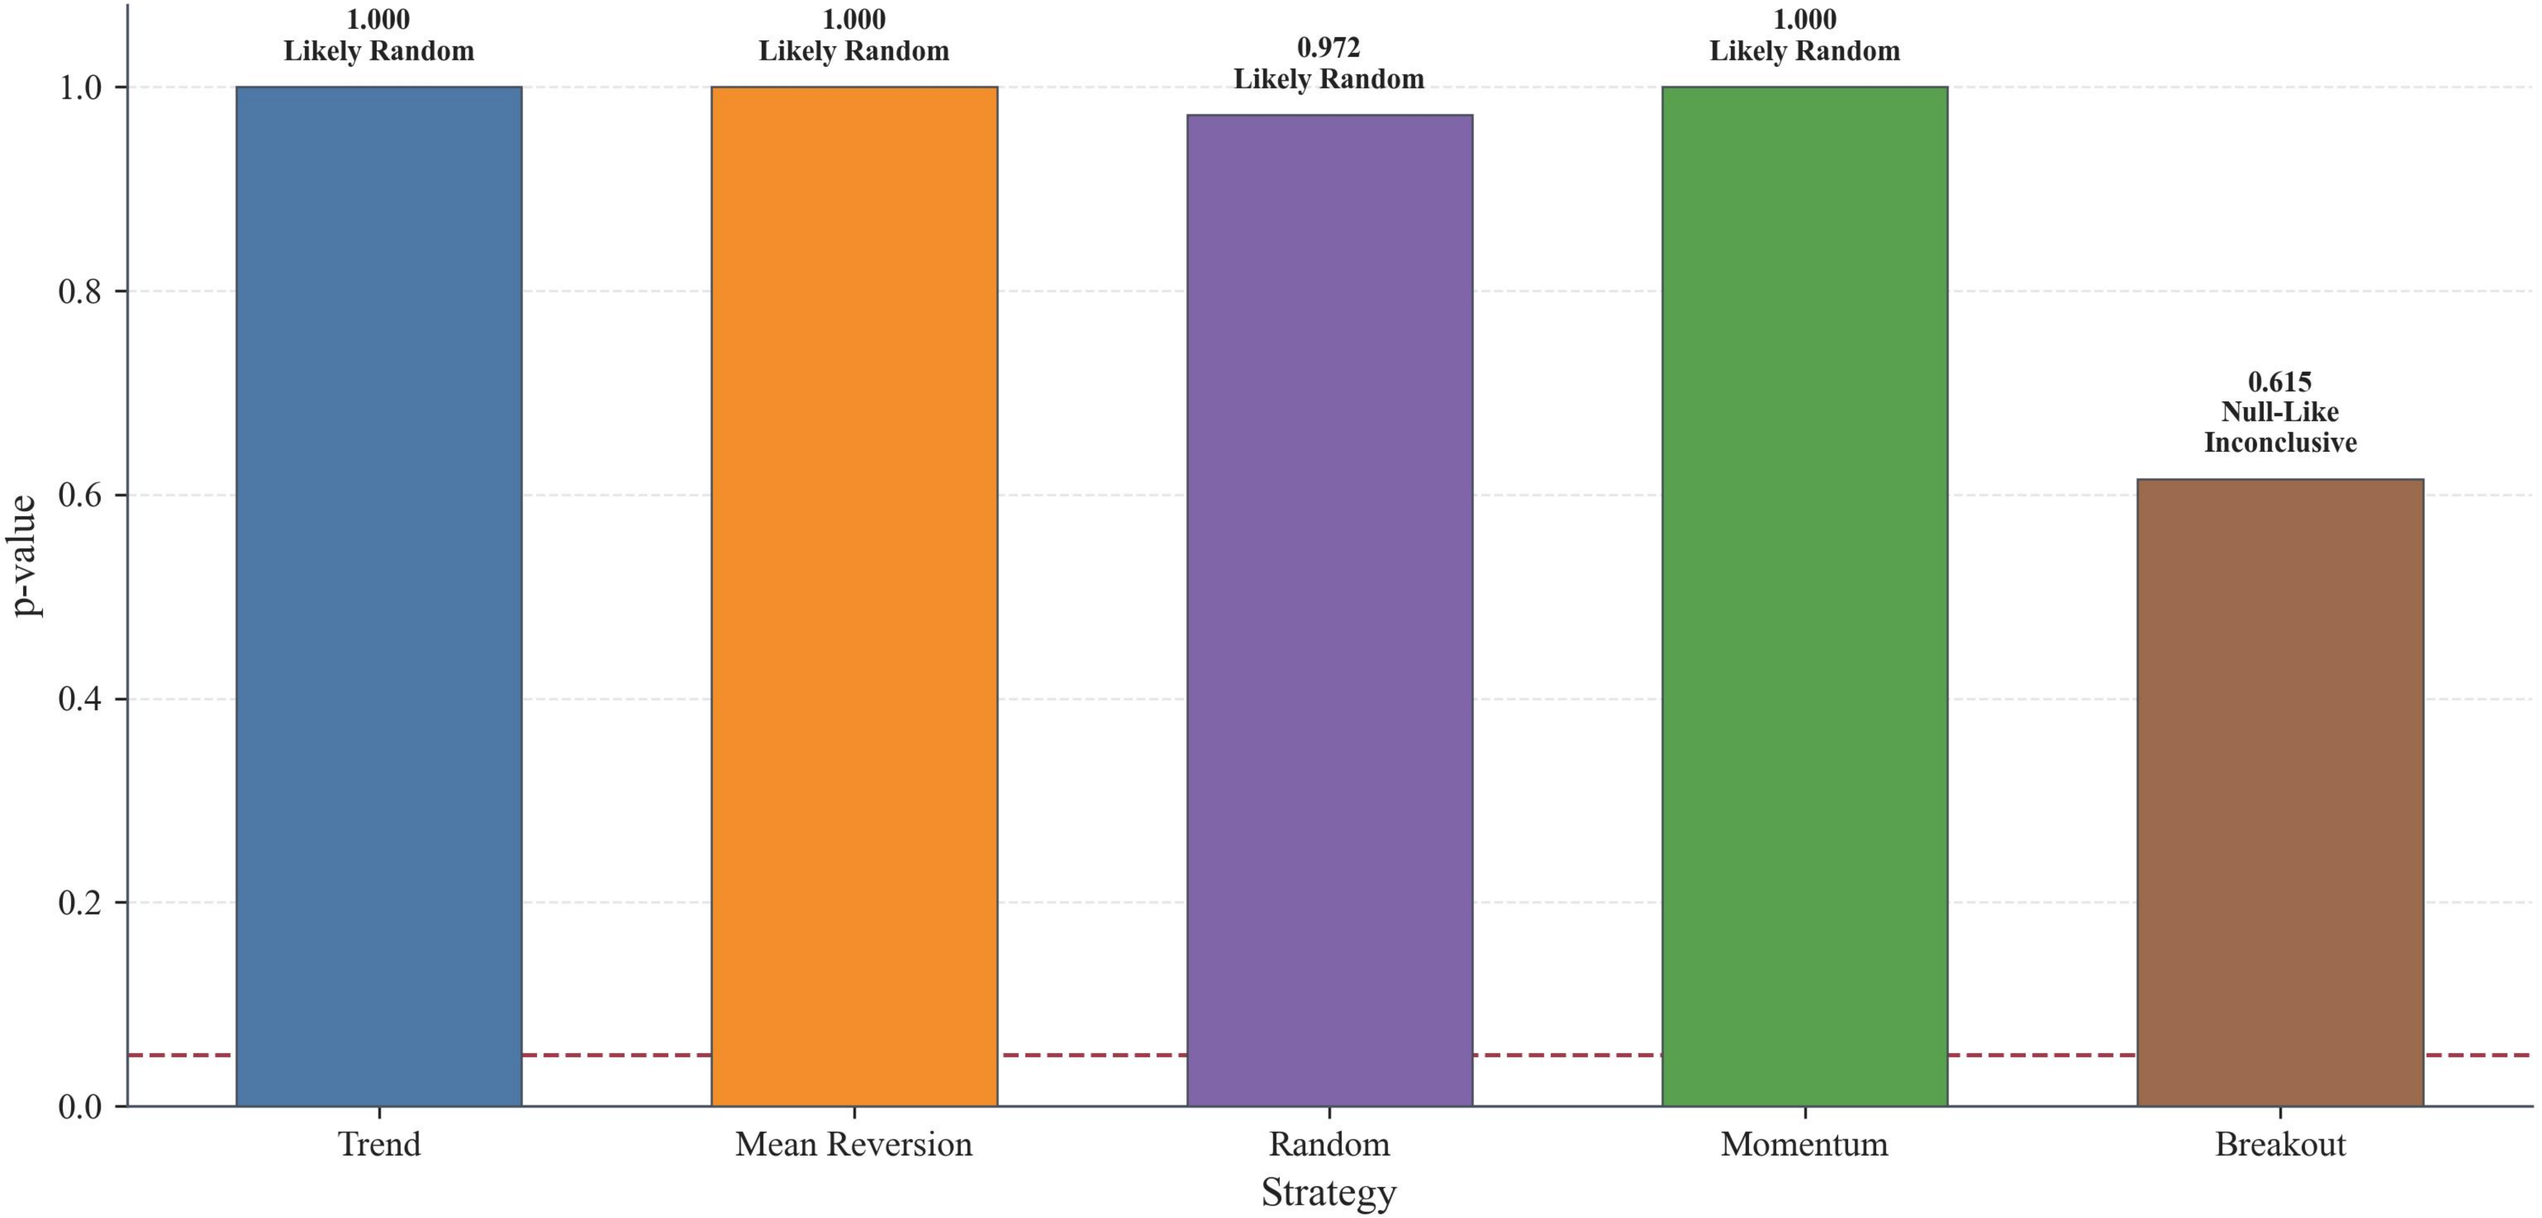
AAPL: Monte Carlo Robustness of RCSI Across Seeds



AAPL: Monte Carlo Robustness of Actual Percentile Across Seeds

Higher values place the observed outcome deeper into the right tail of the simulated distribution.



AAPL: Monte Carlo p-Value by Strategy


The dashed line marks p = 0.05. Lower values indicate stronger evidence against the simulated-random baseline. Labels show the overall evidence class.
