EURUSD=X: Strategy Evidence and Confidence Overview

Evidence labels use scale-free statistics: p-value, percentile, normalized RCSI, robustness, and stability.

Strategy	Evidence	Verdict	Confidence	p-value	Prom.	Pctile	RCSI_z
Trend	No Trades	No Trades	Not Applicable	n/a	n/a	n/a	n/a
Mean Reversion	No Trades	No Trades	Not Applicable	n/a	n/a	n/a	n/a
Random	No Trades	No Trades	Not Applicable	n/a	n/a	n/a	n/a
Momentum	No Trades	No Trades	Not Applicable	n/a	n/a	n/a	n/a
Breakout	No Trades	No Trades	Not Applicable	n/a	n/a	n/a	n/a

Interpretation:
Prom. = -log10(p), so larger values indicate rarer outcomes under the null.
Pctile and RCSI_z provide scale-free evidence and are more comparable across tickers.
Benchmark context appears in the comparison table and equity curve rather than this verdict summary.

EURUSD=X: Regime-Conditional Skill Index by Strategy

No inferential RCSI values are available for this ticker.

No completed trades were generated for any active strategy.
RCSI is therefore not meaningful for this ticker.

EURUSD=X: Trade-Level Return Ratio by Strategy and Market Regime

No regime-level strategy cells met the minimum trade threshold.

All regime cells were suppressed because the strategy logs contain too few completed trades for reliable regime-level interpretation.

EURUSD=X: Strategy Performance Across Market Regimes

No regime heatmap is available for the current ticker.

All regime cells were suppressed because the strategy logs contain too few completed trades for reliable regime-level interpretation.

EURUSD=X: Daily Equity Curves by Strategy and Benchmark

EURUSD=X: Monte Carlo Distribution of Final Returns, Trend Strategy

No Monte Carlo histogram is available for a no-trade strategy.

This strategy produced no completed trades on the current ticker.
A return-distribution histogram would be non-informative, so it was omitted.

EURUSD=X: Monte Carlo Distribution of Final Returns, Mean Reversion Strategy

No Monte Carlo histogram is available for a no-trade strategy.

This strategy produced no completed trades on the current ticker.
A return-distribution histogram would be non-informative, so it was omitted.

EURUSD=X: Monte Carlo Distribution of Final Returns, Random Strategy

No Monte Carlo histogram is available for a no-trade strategy.

This strategy produced no completed trades on the current ticker.
A return-distribution histogram would be non-informative, so it was omitted.

EURUSD=X: Monte Carlo Distribution of Final Returns, Momentum Strategy

No Monte Carlo histogram is available for a no-trade strategy.

This strategy produced no completed trades on the current ticker.
A return-distribution histogram would be non-informative, so it was omitted.

EURUSD=X: Monte Carlo Distribution of Final Returns, Breakout Strategy

No Monte Carlo histogram is available for a no-trade strategy.

This strategy produced no completed trades on the current ticker.
A return-distribution histogram would be non-informative, so it was omitted.

EURUSD=X: Monte Carlo Robustness of RCSI Across Seeds

No repeated-run robustness chart is available for this ticker.

No completed trades were available for repeated robustness testing.
The robustness RCSI chart is therefore not applicable.

EURUSD=X: Monte Carlo Robustness of Actual Percentile Across Seeds

No repeated-run robustness chart is available for this ticker.

No completed trades were available for repeated robustness testing.
The robustness percentile chart is therefore not applicable.

EURUSD=X: Monte Carlo p-Value by Strategy

No inferential p-values are available for this ticker.

No completed trades were generated for any active strategy.
Skill-versus-luck p-value comparisons are therefore not applicable.
